

CITYWATCH **SECURITY**

PROTECTING WHAT MATTERS

RECYCLING CENTRES

PREVENTION MEETS PRODUCTIVITY

COMPLIANCE YOU CAN SEE

High fuel loads, dust, and the constant risk of volatile, hidden, lithium-ion batteries; a single spark from these can quickly escalate into a shutdown event, significantly reducing productive working hours.

CityWatch's Fire Watch service combines targeted hotspot patrols with thermal CCTV analytics and rapid escalation pathways. These ensure compliance and reduce response times when every second matters to protect your people, plant, and reputation.

FIRE WATCH THAT PAYS FOR ITSELF

RECYCLING FACILITIES CARRY UNIQUE IGNITION RISKS

Did you know? Over *10 thousand* battery-related fires are started every year across Australia's waste and recycling streams.

That's nearly *30 fires every day* affecting trucks, transfer stations and recycling centres.

Early detection & rapid escalation are critical parts of CityWatch's Fire Watch to keep your people safe and keep your plant running.

CITYWATCH'S DEDICATED FIRE SAFETY OFFICERS

**WE ARE CURRENTLY DEPLOYED TO OVER 15 SITES
NATIONALLY & HAVE SINGLE-HANDEDLY PUT OUT OVER
30 FIRES**

FROM INCIDENT TO CALM

CityWatch provides highly trained, dedicated Fire Surveillance Officers at over 15 high-risk recycling and waste centres across Australia.

Our team focuses on early detection & expert de-escalation.

CityWatch FSOs have executed rapid response plans to extinguish over 30 fires.

PRECISION MEETS PROCEDURE

Routine patrol, sophisticated software warning systems and advanced FLIR thermal imaging allow CityWatch FSOs to identify and confirm heat anomalies early.

CityWatch Officers utilise hoses and water cannons to suppress and extinguish the heat source.

Typically, this results in a resolution prior to fire service attendance.

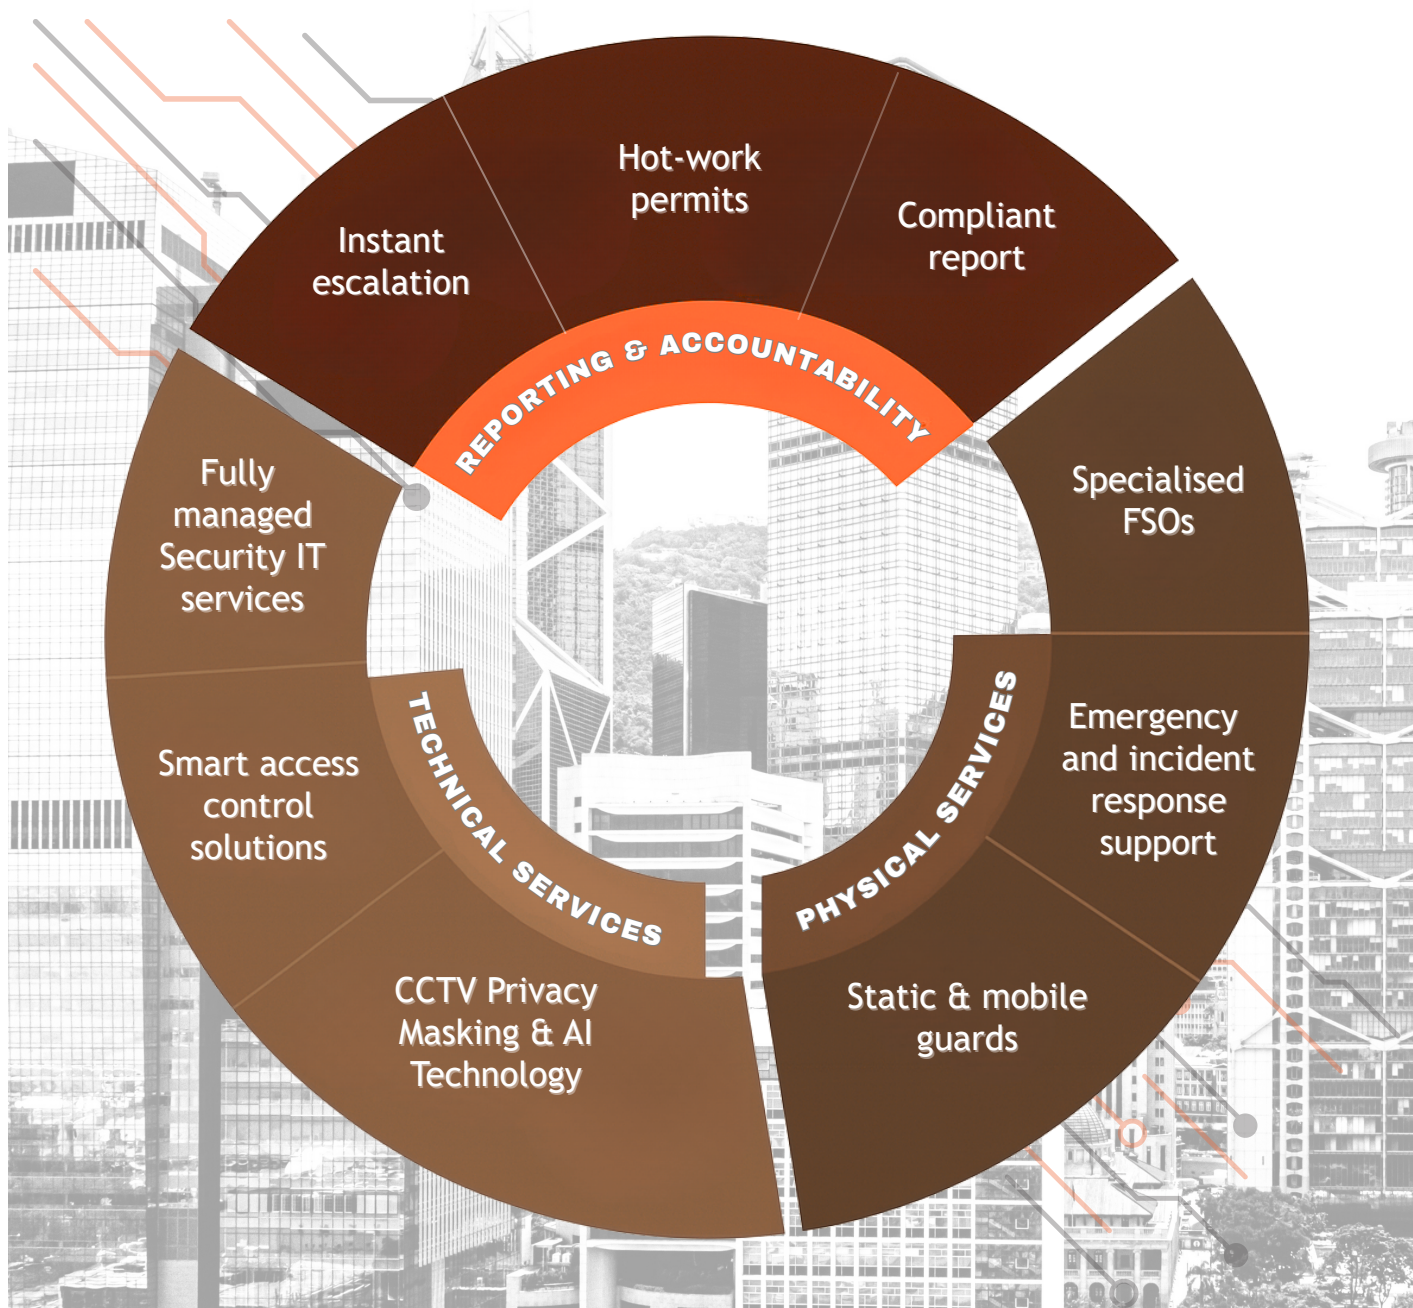

LITHIUM-ION AWARE

Batteries can slip into loads and fail unpredictably, causing fires.

CityWatch's FSOs will escalate prevention through identification, interception and isolation.

We use thermal checks, video analytics, and a clear playbook for a safe, controlled response.
