

Decarbonisation for Local Industries

25th September 2025

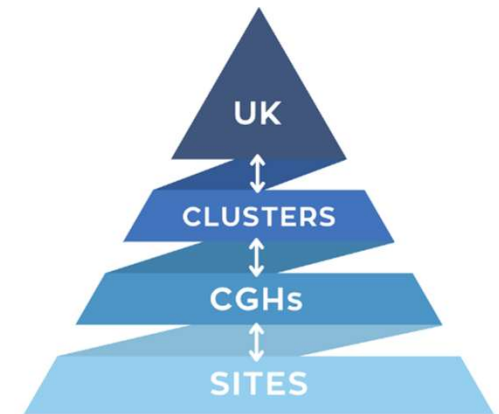

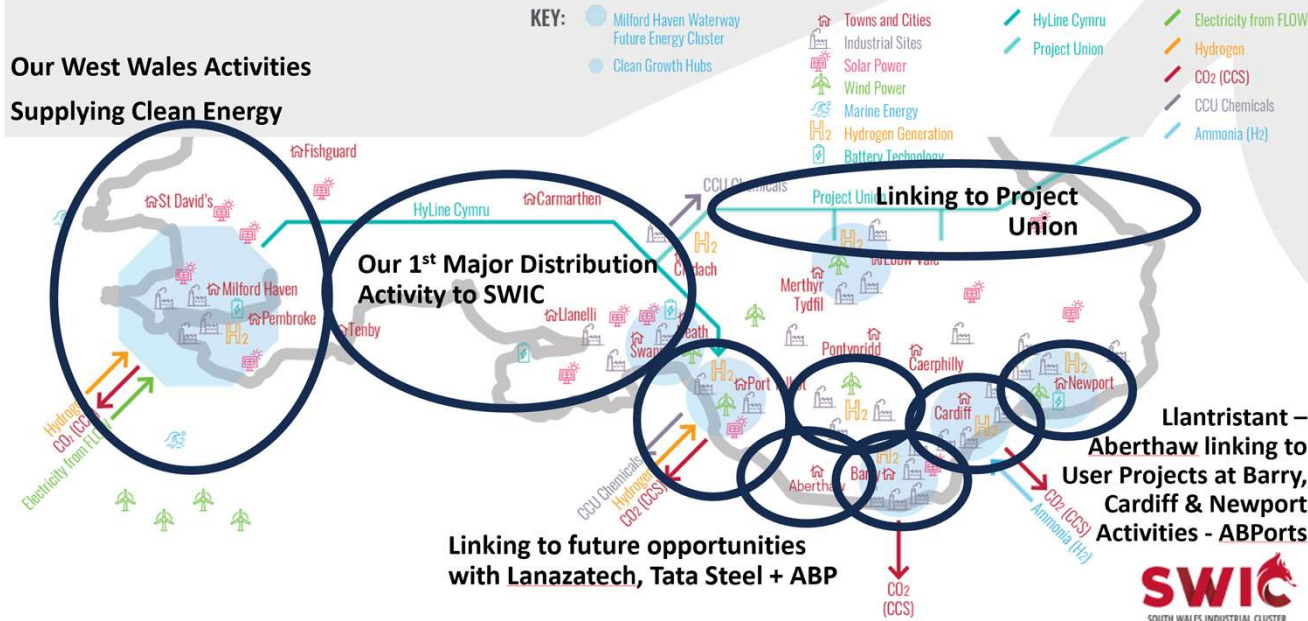

Based on site work carried out across multiple clusters and the wider UK regions, with the methodology formed in South Wales

Ref: 504-3-1-6
Ver: 1

The Cluster Plan Demonstrated Interconnections

Proposed View of our Developing Infrastructure

Localised Industry Determines the shape of Infrastructure Requirements. Clusters and Hubs collectivise Local Needs

Generation of Low/Zero Carbon Energy Sources
(Electricity, Hydrogen, Bio Sources {biomethane, Biomass}, Ammonia)

Distribution of Low/Zero Carbon Energy Sources
(Electricity, Hydrogen, Bio, Ammonia)

Use of Low/Zero Carbon Energy Sources
(Electricity, Hydrogen, Bio, Ammonia)
