

Pediatric Partners
OF THE SOUTHWEST

Behavioral Health Care at Pediatric Partners Good Faith Estimate

The Trekwise program at Pediatric Partners of the Southwest is a service provided by our office and is not an independent care provider. Behavioral health services through our Trekwise program bills via the Psychiatric Collaborative Care Model. **Care provided under this model bills differently than traditional therapy.**

Instead of billing per session, Pediatric Partners bills insurance for the time that our team devotes to your family. This can include sessions, outreach, care navigation, care planning, psychiatric consultation and care coordination both with and without your family present. **Your insurance will be billed by Pediatric Partners of the Southwest based on the hours that our team devotes to your family.** For most families, the maximum time is three hours per month.

Pediatric Partners has a different negotiated service rate with every health insurance company. The following table is **our best estimate of your maximum your out-of-pocket cost** based on our experience billing for the Psychiatric Collaborative Care Model. **This is not a cost guarantee.** Your actual monthly cost will depend on your insurance negotiated rate, the time devoted to your family, and your method of payment (insurance or out of pocket, deductible or no deductible).

Estimated Patient Responsibility	Insurance with NO deductible	Insurance WITH a deductible or co-insurance	Out of pocket self-pay
Per hour of care	N/A	\$235	\$165
Maximum monthly	\$20 - \$45 copay per month	\$705 until deductible/ co-insurance is met.	\$495
