March

SERVICE DEPARTMENT

March is here and it's time to get your equipment ready for planting season. Our Service Department has over a hundred years of combined experience to help with all of your equipment needs. Our inspection process is a thorough examination of all components on your tractor or planter, from PTOs to MFWDs and differentials. Let's make sure your equipment is in good operating conditions to avoid costly downtime.

Give us a call for an inspection.

Thank you,
Jim Phelen

SALES DEPARTMENT

D&M HSS-400 ORCHARD HERBICIDE SPRAYER

The D&M HSS 400 PTO driven orchard herbicide sprayer is built with adjustable front and rear spray booms. Built with easy interchangeable front brake away booms which allows for easy turning and the use in both orchards and vineyards.

Standard Features:

- Heavy duty rectangular tube chassis with adjustable hitch
- Diaphragm pump with tractor mounted independent spray boom controlled manifold
- Aluminum spray boom hoods for drift control with spraying systems quick jet nozzles
- Interchangeable front mounted break away spray booms
- Rear spray boom with easy height adjustment
- Rear mounted hand spray wand with 30" hose
- All stainless steel fittings are used where possible from tank to discharge manifolds
- High volume pump suction strainer and three spray boom discharge filters all are spraying systems products and have easy access for cleaning

Stop by Thomason Tractor Co and check out the D&M HSS-400. Now in stock.

Thank you greatly for your continued business.
- Don York Jr
