

Catch Cloths

Catch Cloths for Cleaner, Safer Conveyor Systems

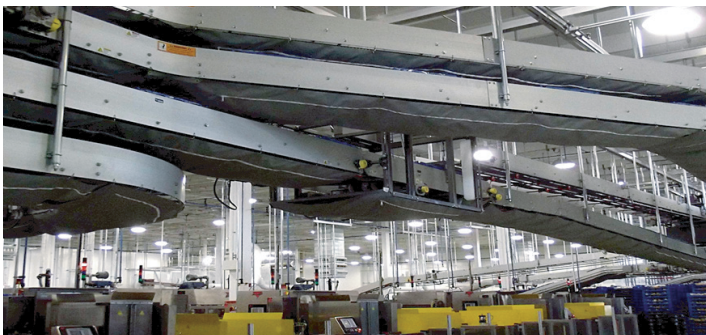

Keep your conveyor system and plant floor cleaner and safer with custom-fit catch cloth solutions.

Whether you're transferring dough to the oven, cooler, or packaging line, these catch cloths are designed to contain crumbs and reduce buildup in high-debris areas. Precision-fit designs ensure better coverage, easier removal, and simplified cleaning and reinstallation.

Built for demanding food processing environments, these catch cloths are made from heavy-duty, vinyl-coated polyester that resists oil, mold, and mildew. Durable construction eliminates contamination risks while extending product life, helping reduce maintenance time and overall operating costs.

Key Benefits:

- Helps maintain cleaner conveyor systems and plant floors
- Designed for high crumb and debris areas
- Easy to remove, empty, clean, and reinstall
- Custom-fit solutions based on your system layout
- Durable materials for long-term performance

HIGHLIGHTS

Catch-cloths are easy to empty, clean & maintain.

Turn your CAD drawing into crumb catching solutions.

OPTIONS

- Zippers
- Windows
- Drain plugs
- Stayput hooks
