## Auto Nozzle Changer

---

NC-002

**TíPman**

## Outline

The Auto Nozzle Changer allows you to stop worrying about production down time ruining your production schedule by automating nozzle replacement.

Supports nozzle diameters up to 32 mm.

Nozzle replacement takes about 30 seconds.

01

Loading nozzles into the Auto Nozzle Changer's magazine.  
Up to 10 nozzles can be loaded at a time.

02

Removing the old nozzle.  
Removed nozzles eject automatically from the Auto Nozzle Changer.

03

A new nozzle is attached and rotation stops automatically when the specified torque is reached.  
No need to worry about over tightening or not tightening the nozzles enough since everything is automatic.  
Once the replacement has been confirmed, the robot returns to the production line.
