

Nozzle Station

NS-01

movie

 **tipman**

Outline

This is a multi-functional model that combines 3 functions as a Nozzle Cleaner, an Anti-Spatter Spray System and a Wire Cutter in one compact unit. One cycle combines all 3 functions of Cutting wire, Cleaning the nozzle and Spraying anti-spatter liquid in just 6 seconds. The Nozzle Station contributes to stable quality and efficient production of welding.

Spray System
NCOP-SP03

Wire Cutter
NCOP-WC03D

01

Cut the wire protruded from the tip by a set length. Cutting wire with 2 pieces of cutter makes the surface of wire remain clean without burr.

02

Pulverize and remove spatter sticking at the inside of nozzle with the reamer. Clamping the nozzle allows for stability and less vibrations during cleaning.

03

Spray anti-spatter liquid to the inside of nozzle. The misty liquid is well applied there.
