Ge t2000 treadmill service manual

Add item(s) to cart without approval number? No problem! Select your approver's name and submit to add items to your cart. If you don't know the approval number, call 800-437-1171 and press opt 1 for the first three prompts. Please select an approver or don't have an approval number? Just give us a call! Adding item(s) to cart without selecting an approver will prompt GE to contact you before confirming shipment. So, make sure to choose your approver's name to avoid any delays. The CE-2 Series 2,000 Treadmill Revision B (409110-006) Manual Information document is designed to provide users with essential information regarding the treadmill's operation and maintenance. The manual consists of various sections that outline the equipment's features, safety precautions, and troubleshooting procedures. ****Introduction**** The CE-2 Series 2,000 Treadmill Revision B (409110-006) is a vital component in exercise testing systems or diagnostic stress tests. This manual provides essential information for safe and effective operation. ****Safety Information**** *** **Danger****: Imminently hazardous situations that can result in death or serious injury. *** **Warning****: Potentially hazardous situations that can lead to death or serious injury if not avoided. *** Equipment symbols**: **+ **Information symbol****: Indicates the need for special attention during operation and when used with other equipment. ****Equipment Overview**** The Series 2,000 Treadmill is designed for use with exercise testing systems or the MTC-1 (manual treadmill controller) to administer a controlled exercise load. Standard features include an emergency stop switch, full handrail set, and a 60-inch walking surface. ****Preparation for Use**** Before using the equipment, ensure that it has been properly assembled, installed, and maintained in accordance with the manufacturer's instructions. Always follow safety guidelines and handle the equipment carefully to avoid accidents or injuries. The Series 2000 Treadmill has a preset incline of approximately 2%, allowing for smooth movement and preventing the shroud from scraping the floor. This information can be found in the "Series 20000 treadmill field service manual". Users should contact their hospital's biomedical technician or electrician for maintenance services within hospitals, while outside hospitals, they should reach out to their hospital affiliation for assistance. Before using the treadmill, ensure you follow operating instructions: keep your hands and feet away from moving parts during defibrillation, and do not place your feet under the belt during elevation changes. Regular maintenance is crucial; perform daily visual inspections, turn off power before making any repairs, and contact an authorized service person if needed. The GE T2000 Treadmill features a 60-inch walking surface, accommodates severely debilitated patients, and has a range of safety features, including an emergency stop switch and enhanced tolerance to electrical changes. It also boasts a self-calibrating digital control system for precise speed and grade adjustments.
