

Collage Prompts To Try: 5 x 7 inch cardstock - Kickstarting your creative process with COLLAGE. Feel Free to use markers, colored pencils and watercolors as well.

Think of a subject : object or person, draw it out as best you can, fill in your subject with the given clippings and/or add your own.

Does it need a background? (negative space) or should your subject stand alone against an untreated 'environment'?

Think of a place: actual location or imaginary landscape, draw the outline lightly and add clippings where you would like.

If you run out of cutouts find more art material, whether textiles, fibers, posters off the streets or around your house or from that of your friends and neighbors.

Think about text: Choose a word cutout or letter from your clippings bag. What message does it convey?

Write or draw these ideas down. What image can harmonize or contrast with this word and/or shape?

Design your card with an image and text synchronized and then draw a card with image and text juxtaposing each other.

What new relationships and connections are revealed and do you see?

Challenge: Play with scale, color and space. Perhaps **focus** on one element for each prompt.

Send in your art! We would love to see your art from our first kit on COLLAGE.

We will post it on Social Media and on our website. Take a photo, and email it with your name and title to madrivervalleyarts@gmail.com.

Thank you for participating!
