Scientific Work Plan 2023

New initiatives

Working Groups

01. Paediatric Patient Reported Outcomes in paediatric anticancer drug development.
   The global aim of the group is to develop a framework and tools to support implementation of patient-reported outcomes in a meaningful way in pediatric oncology clinical trials.

02. Preparing for the new provisions of the revised EU Pharmaceutical Legislation which includes the Paediatric and Orphan regulations
   Initiative: Three-year Working Group to start in Q4 2023

Other initiatives

03. Access to clinical trials (including but not limited to decentralized trials)
   Initiative: A dedicated session at the ACCELERATE Annual Conference 2024
Scientific Work Plan 2023

Ongoing initiatives

Research and Working Groups

ACCELERATE Logbook. Launch of the preparatory and pilot phase of the revitalized Long-Term Follow-Up initiative with the ultimate goal to establish an International harmonised, and sustainable data registry of late adverse effects of molecular targeted drugs and immuno-oncology products.

Fostering Age Inclusive Research (FAIR). Continuation of the work of the Group including the definition of a 5-year work plan and an effective communication strategy.

Paediatric Strategy Forums

Paediatric Strategy Forums 2023. Two in person (with virtual participation) Paediatric Strategy Forums per year and one or two follow up meetings (prioritisation or living prioritisation meetings).

Education

ALADDIN. The Multi-stakeholder Education Alliance to Accelerate Drug Development for Children and Adolescents with Cancer will focus on implementation of the educational activities which were discussed and designed in the first six months of the project.
