Introducing the newest addition to the award winning line of Luminys fixtures! The LED Table Top Sun 1200

The **1200 Watt Table Top Sun** is the latest addition to the **Luminys** line of High Intensity LED Lights that work on standard house power, operating on just 12 Amps at 110 VAC or 6 Amps at 220VAC. The Table Top Sun LED is tuned to match the color quality and consistency of our traditional *Enhanced Spectrum Plasma® SoftSun®* bulbs, with a 95+ CRI at 5000ºK., a perfect match for the CMOS sensor in modern High Speed digital cameras. The Table Top Sun can dim through its full output range with no color shift, and no flicker, and is compatible with DMX.
