TEMPORARY FENCING

About us

At The Advanced Group, we're in the business of **making life easier for our customers** — with reliable, professional services that just get the job done right.

We're proud to be one of Australia's trusted names in temporary fencing, site security, water-filled barriers, environmental services, landscaping, and commercial cleaning. Whether you're running a major construction site, planning a large-scale event, or keeping a property looking its best, we've got the people, tools, and know-how to support you.

We've come a long way since our early days nearly 40 years ago, when we kicked off with just commercial cleaning and trolley services. Today, we're a multi-service group with specialist teams working across a wide range of industries — from civil construction and mining to education, retail, logistics, and government.

What hasn't changed? Our belief that good service still matters.

Our team is made up of experienced, down-to-earth professionals who work together to make things easy for our clients. We show up on time, follow through on our promises, and stay up to speed with the latest gear and smarter ways of working — so you get the best possible result with minimal fuss.

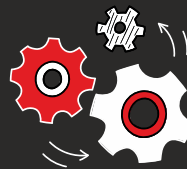

Whether it's a quick job or a complex, multi-stage project, you can count on us for:

**FAST AND CLEAR
COMMUNICATION**

**HIGH SAFETY
AND COMPLIANCE
STANDARDS**

**SMART, EFFICIENT
SOLUTIONS TAILORED
TO YOUR SITE**

**A COMMITMENT TO
DOING THINGS RIGHT
THE FIRST TIME**

We see ourselves as more than a supplier — we're your service partner, invested in your success. And while we take our work seriously, we're easy to deal with, flexible, and always ready to go the extra mile.

Our Vision

"To create an exceptional team and to continuously evolve by supporting the changing needs of our customers."

Our Mission

"To enable our customers to succeed by being their go-to provider of business support services."

Our Values

PARTNERSHIP DRIVEN SERVICE

We don't just supply — we partner. At The Advanced Group, we see every client relationship as a long-term collaboration built on trust, reliability, and mutual success.

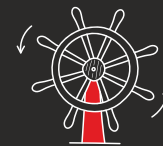

CUSTOMER FIRST MENTALITY

Our clients sit at the heart of everything we do. We tailor our services to meet your unique needs with responsive communication, proactive solutions, and a commitment to exceeding expectations.

CUTTING EDGE INNOVATION

We embrace new technology and continuously evolve our practices to remain at the forefront of our industries — delivering smarter, safer, and more efficient solutions to every project.

CONSISTENT QUALITY, EVERY TIME

From temporary fencing to environmental controls and commercial cleaning, consistency is our benchmark. We maintain high standards across all divisions to ensure dependable, high-quality outcomes.

INDUSTRY-LEADING COMPLIANCE AND SAFETY

We operate to the highest standards of compliance, safety, and environmental responsibility — not because we have to, but because it's the right thing to do.

MULTI-SERVICE CONVENIENCE, SINGLE-SOURCE ACCOUNTABILITY

With one trusted provider across fencing, barriers, landscaping, cleaning, and environmental protection, clients enjoy the simplicity of dealing with one group — and the confidence of dealing with the best.

PRODUCTS AND SERVICES RANGE

CONSTRUCTION SUPPORT

- ❖ Temporary Mesh Fencing
- ❖ Temporary Solid Hoarding
- ❖ Temporary Koala Fencing
- ❖ Fencing Accessories:
 - Barbed Wire
 - Wind Bracing
 - Hand Rails
 - Pedestrian Gates
 - Panel toppers
- ❖ Safety Fencing

Our Clients

GC500 V8 SUPERCARS - GOLD COAST

Event	: Boost Mobile Gold Coast 500
Location	: Surfers Paradise, Queensland
Client	: Event Organisers, Supercars Championship
Duration	: Annual event, October
Our Role	: Event Infrastructure Partner - Temporary Fencing, Barriers & Site Support
Involvement	: 6 consecutive years (including 2025)

Overview

Every October, the streets of Surfers Paradise erupt with the roar of V8 Supercars for the Boost Mobile GC500 — one of Australia's most iconic motorsport events. With crowds in the tens of thousands, the event demands world-class organisation and seamless infrastructure delivery.

For the past six years, **Advanced Temporary Fencing** has been a trusted infrastructure partner, providing the essential site services that keep the event safe, secure, and on schedule. Our scope includes **15 kilometres of temporary fencing, 8 kilometres of crowd control barriers, water-filled barriers**, and other critical event infrastructure. From the weeks of bump-in, through race weekend, to the final clean-up, our crews ensure the right gear is in the right place, exactly when it's needed.

The GC500 footprint presents unique challenges: compressed installation timelines, public road closures, strict safety requirements, and the need to coordinate with multiple contractors and stakeholders. To meet these demands, our experienced **Operations Team** carefully integrates delivery schedules into our works program. This ensures our trucks, installation crews, and removal teams stay ahead of the curve — avoiding delays and providing confidence to organisers.

The result? Organisers can focus on the spectacle of the event, knowing their infrastructure partner has the logistics covered. Over six consecutive years, we've consistently delivered to deadline, maintained compliance, and supported the GC500 team with flexible, responsive service.

Our involvement in the GC500 reflects what Advanced Temporary Fencing does best: combining planning, reliability, and hard work to support some of the nation's biggest events. We're proud to contribute to the energy and excitement of race week and look forward to keeping the Gold Coast roaring for years to come.

CROSS RIVER RAIL – BRISBANE, QUEENSLAND

Project	: Cross River Rail
Location	: Brisbane CBD and Surrounds
Client	: Major Contractors and Infrastructure Delivery Authorities
Our Role	: Site Safety Partner – Fencing, Semi-Permanent Barriers & Custom Safety Solutions
Involvement	: Ongoing (multi-year engagement since project commencement)

Overview

The **Cross River Rail** project is one of Queensland's most significant infrastructure undertakings, designed to transform travel across South East Queensland. The project spans **10.2 kilometres**, with **5.9 kilometres of twin tunnels** under the Brisbane River and CBD, and includes five new stations: four underground (Boggo Road, Woolloongabba, Albert Street, Roma Street) and one above-ground at Exhibition. Scheduled for completion in 2026, the project will reduce travel times, improve connectivity, and increase network reliability for generations to come.

Since its commencement, **Advanced Temporary Fencing** has played a vital role in ensuring safety and security across multiple stages and worksites. Over the course of the project, we have delivered more than **15 kilometres of temporary fencing**, as well as **semi-permanent barriers** and **customised safety solutions** to meet the unique requirements of a large-scale, urban rail development.

Working across high-traffic CBD zones, deep tunnel sites, and evolving construction footprints has required precise coordination, strict compliance, and adaptability. Our operations team has worked hand-in-hand with Tier 1 contractors and project stakeholders to ensure solutions are delivered on time, fit for purpose, and able to adapt as site conditions change.

By providing scalable fencing and barrier systems, secure access points, and tailored solutions for complex worksites, we've helped create safe environments for workers and the public alike. Importantly, our **reliable service, safety-first approach, and responsiveness** have allowed contractors to remain focused on construction outcomes, confident that site protection is in capable hands.

As the project moves toward its 2026 completion, **Advanced Temporary Fencing is proud to continue supporting the delivery of this landmark transport project**, helping to keep sites safe, secure, and compliant at every stage of the journey.

COOMERA CONNECTOR PROJECT – STAGE 1

Project	: Coomera Connector – Stage 1
Location	: Coomera to Nerang, Gold Coast, QLD
Client	: Major Road Contractors (on behalf of Department of Transport and Main Roads)
Our Role	: Environmental Protection & Temporary Fencing Partner
Divisions Involved	: Advanced Temporary Fencing & Advanced Environmental Services
Involvement	: Ongoing – Multi-Year Infrastructure Support

Overview

The **Coomera Connector – Stage 1** is a landmark infrastructure project delivering a new **16-kilometre motorway** between Coomera and Nerang on the northern Gold Coast. Jointly funded by the Australian and Queensland governments, the \$3.5 billion project is designed to ease pressure on the M1, support population growth, and deliver long-term economic and transport benefits. Once complete, it will carry up to **57,000 vehicles per day**, cut congestion by around 10%, and include a dedicated **16km active transport path**.

Alongside its scale and complexity, the project carries a strong commitment to **environmental protection**, with several sensitive habitats located along the alignment. That's where **Advanced Temporary Fencing** and **Advanced Environmental Services** have played a critical role.

To date, our teams have delivered:

- **20km of Temporary Koala Fencing** to protect local populations from construction impacts
- **30+ km of Sediment Control Devices** to reduce runoff and safeguard waterways
- A range of **erosion, fauna, and delineation controls** to maintain compliance with strict biodiversity requirements

With Stage 1 spanning a long, linear worksite, our crews have worked closely with Tier 1 contractors and environmental consultants to deploy solutions that are durable, compliant, and tailored to changing site conditions. Our **Temporary Koala Fencing (TKF)** system, recommended by Queensland's Department of Transport and Main Roads, has been instrumental in ensuring safe wildlife corridors across the alignment.

By integrating safety and environmental protection into one streamlined service, we've given contractors confidence that compliance and community expectations are being met. Our ability to mobilise quickly, adapt to evolving requirements, and deliver consistently high-quality outcomes has made us a trusted partner on this major project.

Advanced Group is proud to contribute to a safer, greener, and more connected future for South East Queensland.

Testimonials

The Temporary Koala Fence from Advanced Temporary Fencing has been a game-changer for our environmental team. We've trialled different approaches over the years, but this system is the first we've seen that truly balances practicality with wildlife protection. Being prefabricated and all metal it is incredibly durable in the field when compared to the plastic strip versions we've previously used. This gave us peace of mind knowing Koalas are kept out of harm's way. From a compliance and conservation standpoint, it's exactly what we needed on a project of this scale.

Karly-Ann K
Environmental Supervisor

The gabion structures installed by Advanced Environmental Services were an important part of the erosion and sediment control plan for our project. Their team not only met the engineering requirements but also nailed the environmental considerations around the somewhat sensitive ecology on our project which was near waterways and vegetation. The installation was completed on time, to specification, and with a high level of professionalism. It's rare to find a contractor that can balance compliance, safety, and efficiency so well.

Gordon L.
Senior Project Engineer

We've used Advanced Environmental Services for gabion installations on several of our projects over the years, and they consistently deliver quality workmanship. The structures are always neat, secure, and built to last. Their installation teams work in seamlessly with our other contractors, which in turn makes our job easier. Reliable team, reliable results. Highly recommended.

Hamish B.
Site Supervisor

Advanced Environmental Services installed rock mattresses for us on a complex open drain section of our Bahrs Scrub sub-division project, and the quality was excellent. Their crew worked efficiently in tricky site conditions due to a series of weather events and kept everything on track as well as compliant with environmental standards. The end product is robust and well-built. We'll definitely bring them back on future jobs.

Terry G.
Project Manager

Managing tens of thousands of people safely requires suppliers we can absolutely count on, and the crew at Advanced Event Services tick that box every time. Their fencing and water barriers are clean, secure, and set up with precision. The team were flexible with our site changes and worked through the night to get it all in place before gates opened. Their professionalism gives us peace of mind so we can focus on the show itself. We wouldn't run a major festival without them.

Belinda P
Senior Event Coordinator

On a project our size, sediment control isn't just a box to tick – it's a significant risk management issue.

The coir logs from Advanced Environmental Services have been a reliable solution across multiple stages of our works.

The 3m by 200mm size was perfect for our drainage and batters, easy for the crew to place quickly, and they hold up really well heavier rainfall events.

Having them delivered to site and being the cheapest we've found has helped us stick to our works program and the budget. We'll continue using them on upcoming projects.

James T.
Project Engineer, SEQ Civil Infrastructure
