Current Issues in Head and Neck Cancer: Managing Structural, Functional and Emotional Consequences

Please join us as experts across multiple disciplines address state-of-the-art approaches to surviving and thriving with the challenges posed by living with head and neck cancers. Laryngectomees, patients with oral, pharyngeal or laryngeal cancers and their companions, speech pathologists and other health care providers who offer services, and other interested individuals are warmly welcomed.

Date / Time: October 16, 2019: 8:30 am—5:00 pm (registration opens at 7:30 am)
Location: Salus University, 8360 Old York Road, Elkins Park, PA 19027 (directions and room numbers will be sent to all registrants)
Cost: $75 for speech pathologists (.70 ASHA CEUs)
FREE for all head/neck cancer survivors and companions, Salus faculty, and past/current externship supervisors and clinical educators

BREAKFAST AND LUNCH INCLUDED
Vendors will be onsite and available to discuss their products throughout the day

Disclosure: All course instructors and relevant personnel have completed a disclosure form. There are no relevant financial or nonfinancial relationships to disclose.

Learning Objectives:

- Understand the implications of total laryngectomy vs organ-sparing surgery for laryngeal cancer
- Describe anatomical and neurophysiological changes that impact voicing and speech competence post-total laryngectomy, and options for voice and speech restoration
- Describe the incidence and co-occurrence of pain and anxiety symptoms after treatment for head and neck cancer, and strategies for managing these consequences
- Recognize new developments in head and neck prosthetic reconstruction, and their application to relevant cancer populations
- Explain the impact of head and neck cancer treatment on oral, pharyngeal, and esophageal swallowing function, and management of dysphagia in these populations
- Comprehend the challenges of emotional coping and self-advocacy for head and neck cancer patients, and strategies for managing these issues
