Company

KPM Ricambi S.r.l. was founded in 2006, after more than 30 years of consolidated experience in the transmission gear production sector. Based in Zola Predosa (Bologna), in the beating heart of the Italian Motor Valley, the company has established itself as a strategic partner for the worldwide spare parts market.

Production and Quality "Made in Italy"

The entire production cycle of KPM Ricambi takes place strictly in Italy.

This choice reflects our commitment to maintaining the quality standards that have made Italian mechanics famous worldwide.

Solutions with perfect interchangeability: we produce non-original components designed to be perfectly interchangeable with the applications of the main European and American manufacturers.

Every piece undergoes rigorous testing and quality checks to ensure that assembly and performance are identical to the original.

Products and Services

Thanks to extensive experience in the sector, we offer an excellence "Made in Italy" range of transmission gears, cylindrical and bevel gear sets intended for the spare parts market of gearboxes and differentials for trucks, buses, and tractors.

We produce non-original components that are perfectly interchangeable with the main American and European applications (such as Volvo, Mercedes, Mack, Fuller/TTC and Spicer).

Every piece is manufactured with modern technologies and subjected to strict Klingelberg quality controls, guaranteeing high production standards and a rapid, timely, and highly professional technical support service.

To satisfy specific needs, upon request we activate a special customization service both on the product, through the marking of your logo, and on the packaging, with a custom label applied to the box.
