A LEGACY OF INNOVATION

For over 60 years, Gamo has been at the forefront of designing and manufacturing premium air rifles, air pistols, and air gun ammunition, trusted by enthusiasts worldwide for small game hunting, competition, recreation, and pest control.

Today, Gamo products are available in more than 90 countries, with a global presence through offices in the USA, UK, Spain, and Mexico. As a truly iconic brand, Gamo combines cutting-edge technology with exceptional quality, backed by unmatched customer service and engagement.

THE DIFFERENCE IS OUR DNA

- Fully integrated manufacturing
- Repeated test firing
- Exhaustive quality control procedures
- Automotive-grade robotic technology
- Patented polymer-jacketed barrel
- Patented Whisper® sound-dampening technology
- Green manufacturing facility

Dominate the air with Gamo - the most innovative air rifle manufacturer.

THE RIGHT AIR GUN > THE RIGHT AMMO > THE PERFECT COMBINATION

At Gamo, we manufacture many different air guns to fit the needs of versatile shooters everywhere. With such a variety of choices, we've created the Gamo PROSHOT ID SYSTEM to help you better align your shooting needs with the performance attributes of each model. From Hunting to Pest Control & Recreation to Target & Competition, all Gamo air gun and ammunition packages are clearly labeled and color coordinated to designate their recommended primary usage—so you can easily pair the right ammo with the right air gun. Every time.

GAMO PRODUCT RECOMMENDED USAGE

PEST CONTROL + RECREATION

Provides accuracy and high velocity—ideal for nuisance animals such as mice, rats, birds and snakes. Also perfect for recreational shooting and other everyday uses.

HUNTING

Delivers accuracy with higher energy downrange for ultimate impact and penetration—ideal for small game such as rabbits, squirrels, raccoons, and crows.

TARGET + COMPETITION

Offers the ultimate in accuracy and consistent performance—ideal for both training and competitive shooting.

All velocities have been measured with PBA (Performance Ballistic Alloy) pellets.

Sound suppression technology and sound levels

Gamo's patented Whisper® technology leads the air rifle industry in sound suppression. This technology is categorized into three tiers—Whisper, Whisper Maxxim and Whisper Fusion—for quiet, quieter, and quietest performance. However, «noise reduction» does not mean «silence», as sound levels will vary depending upon pellet choice. A lighter, faster and smaller caliber pellet, for instance, will produce a louder sound than a heavier, slower and higher caliber pellet.

Overall performance: **-23 dB(C)**

Overall performance: **-19 dB(C)**

Overall performance: **-13 dB(C)**

Whisper® is a trademark of and is used under license by J. D. Jones. Fusion® is a Registered Trademark of Federal Cartridge Company. Used under license. Fusion® is a Registered Trademark of Federal Cartridge Company. Used under license.

10X Quick-Shot Rapid Reload Technology

Our patent-pending technology enables you to shoot up to 10 pellets without reloading. Simply break the barrel and fire for lightning-quick follow-up shots.

This patent-pending 10X GEN 2 Technology includes our revolutionary horizontal integration, making it lighter, more compact and low profile, offering a smoother operation and improved accuracy.

Inertia fed. Market leading design. This patent-pending 10X GEN3i Technology indexes using the inertia force from the recoil of the air rifle - creating a smoother and more precise breech-loading process.

Recoil Reducing Rail - RRR

The RRR was developed to subdue the taxing stresses placed on your scope from the intense recoil of air guns and high-powered rifles. The Recoil Reducing Rail uses patent pending two-piece aluminum construction separated by dual polymer struts to absorb the shockwaves generated by the recoil. Once the scope is mounted to the Recoil Reducing Rail, the recoil stresses to its internal components are reduced by almost 100%.

Inert gas technology

Based off the groundbreaking IGT platform, the IGT MACH 1™ replaces the standard spring powerplant with an Inert Gas Cylinder, but the IGT MACH 1's monster 33 millimeter cylinder delivers more velocity and terminal penetration. The pneumatic cylinder promotes smooth and consistent cocking efforts with constant power delivered to any pellet you shoot.

The IGT™ (Inert Gas Technology™) from Gamo enhances your hunting or target shooting experience. This technology consists of a pneumatic cylinder that replaces the spring, enabling the shooter to get more terminal velocity, less vibration, more consistent power, and a constant and smooth cocking effort.

Shock Wave Absorber - SWA

SWA (Shock Wave Absorber) technology is an innovative feature designed to enhance the shooting experience in air rifles. This technology focuses on reducing perceived recoil when firing, achieved through the integration of three interchangeable rubber shock absorbers in the stock of the rifle. These absorbers not only lessen the impact of recoil on the shooter's shoulder but also allow for customization of the shock absorption level according to individual preferences, offering a more comfortable and precise shooting experience.

Trigger technologies

The innovative CAT (Custom Action Trigger) system allows Gamo air rifle owners to independently adjust both the 1st and 2nd stages of the trigger, customizing the pull weight and crispness to their exact preferences. This cutting-edge technology provides a fully tailored shooting experience, giving users unparalleled control and precision.

The SAT (Smooth Action Trigger) enhances shooting precision by offering a custom design ideal for both hunting and target shooting, helping you perform like a pro. With its smooth pull, the SAT trigger maximizes pinpoint accuracy and delivers a crisp, clean feel, ensuring a superior shooting experience.

GAMO CHARGING POINT

We've done it, again

Gamo has created its network of **PCP Charging Points** for gun shops and specialized stores.

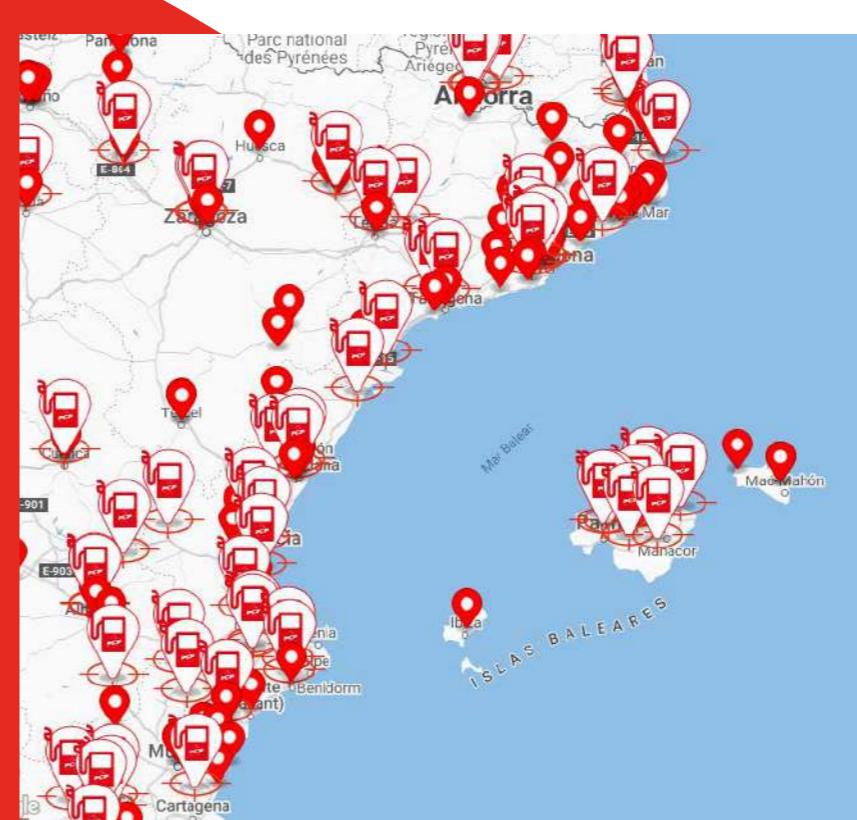

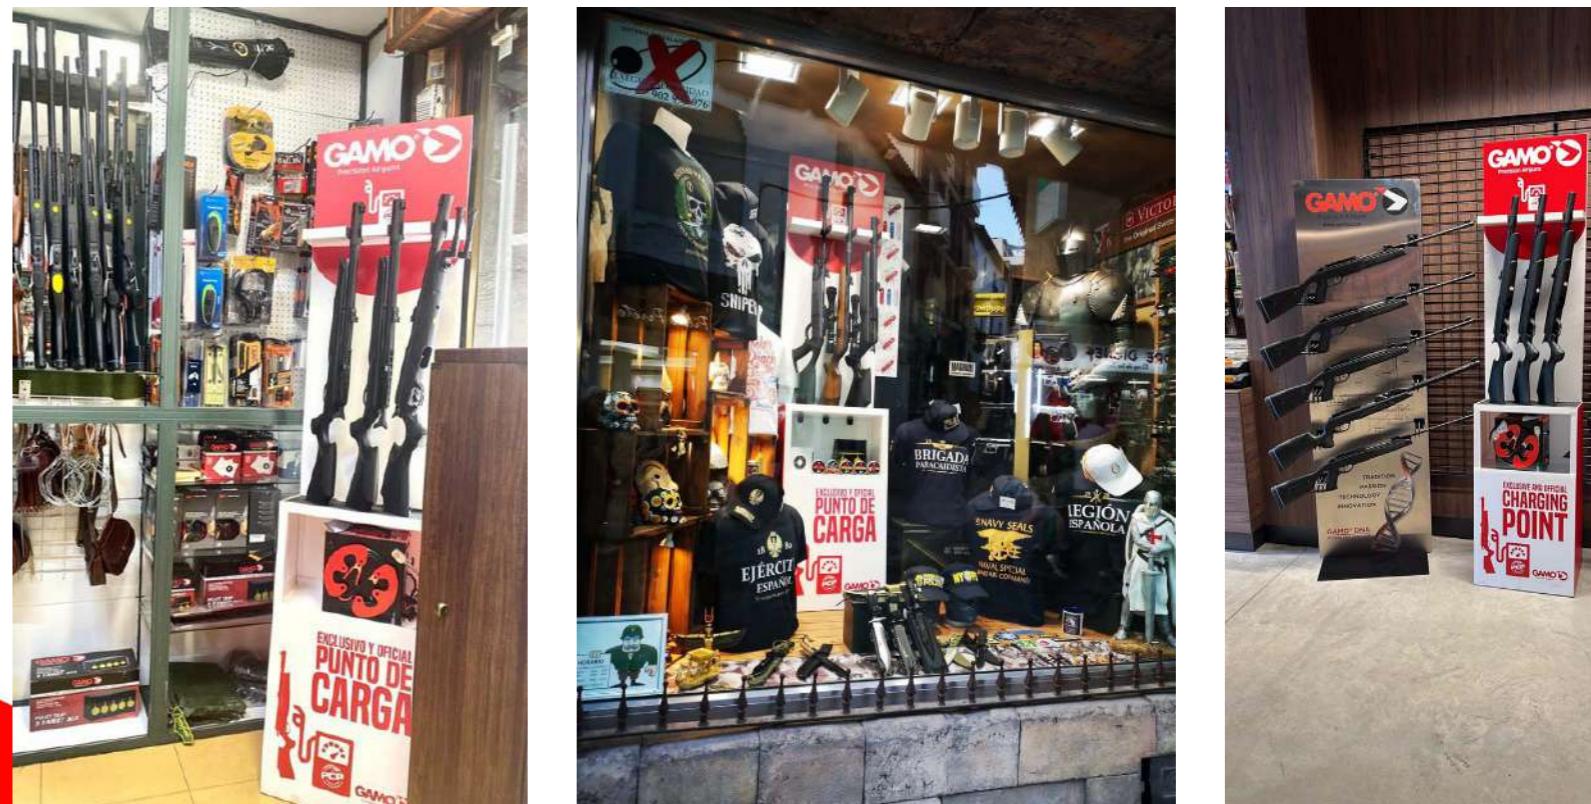

A revolutionary and exclusive service that will allow you to reload your PCP carbine wherever you are.

Gamo's Charging Point PCP

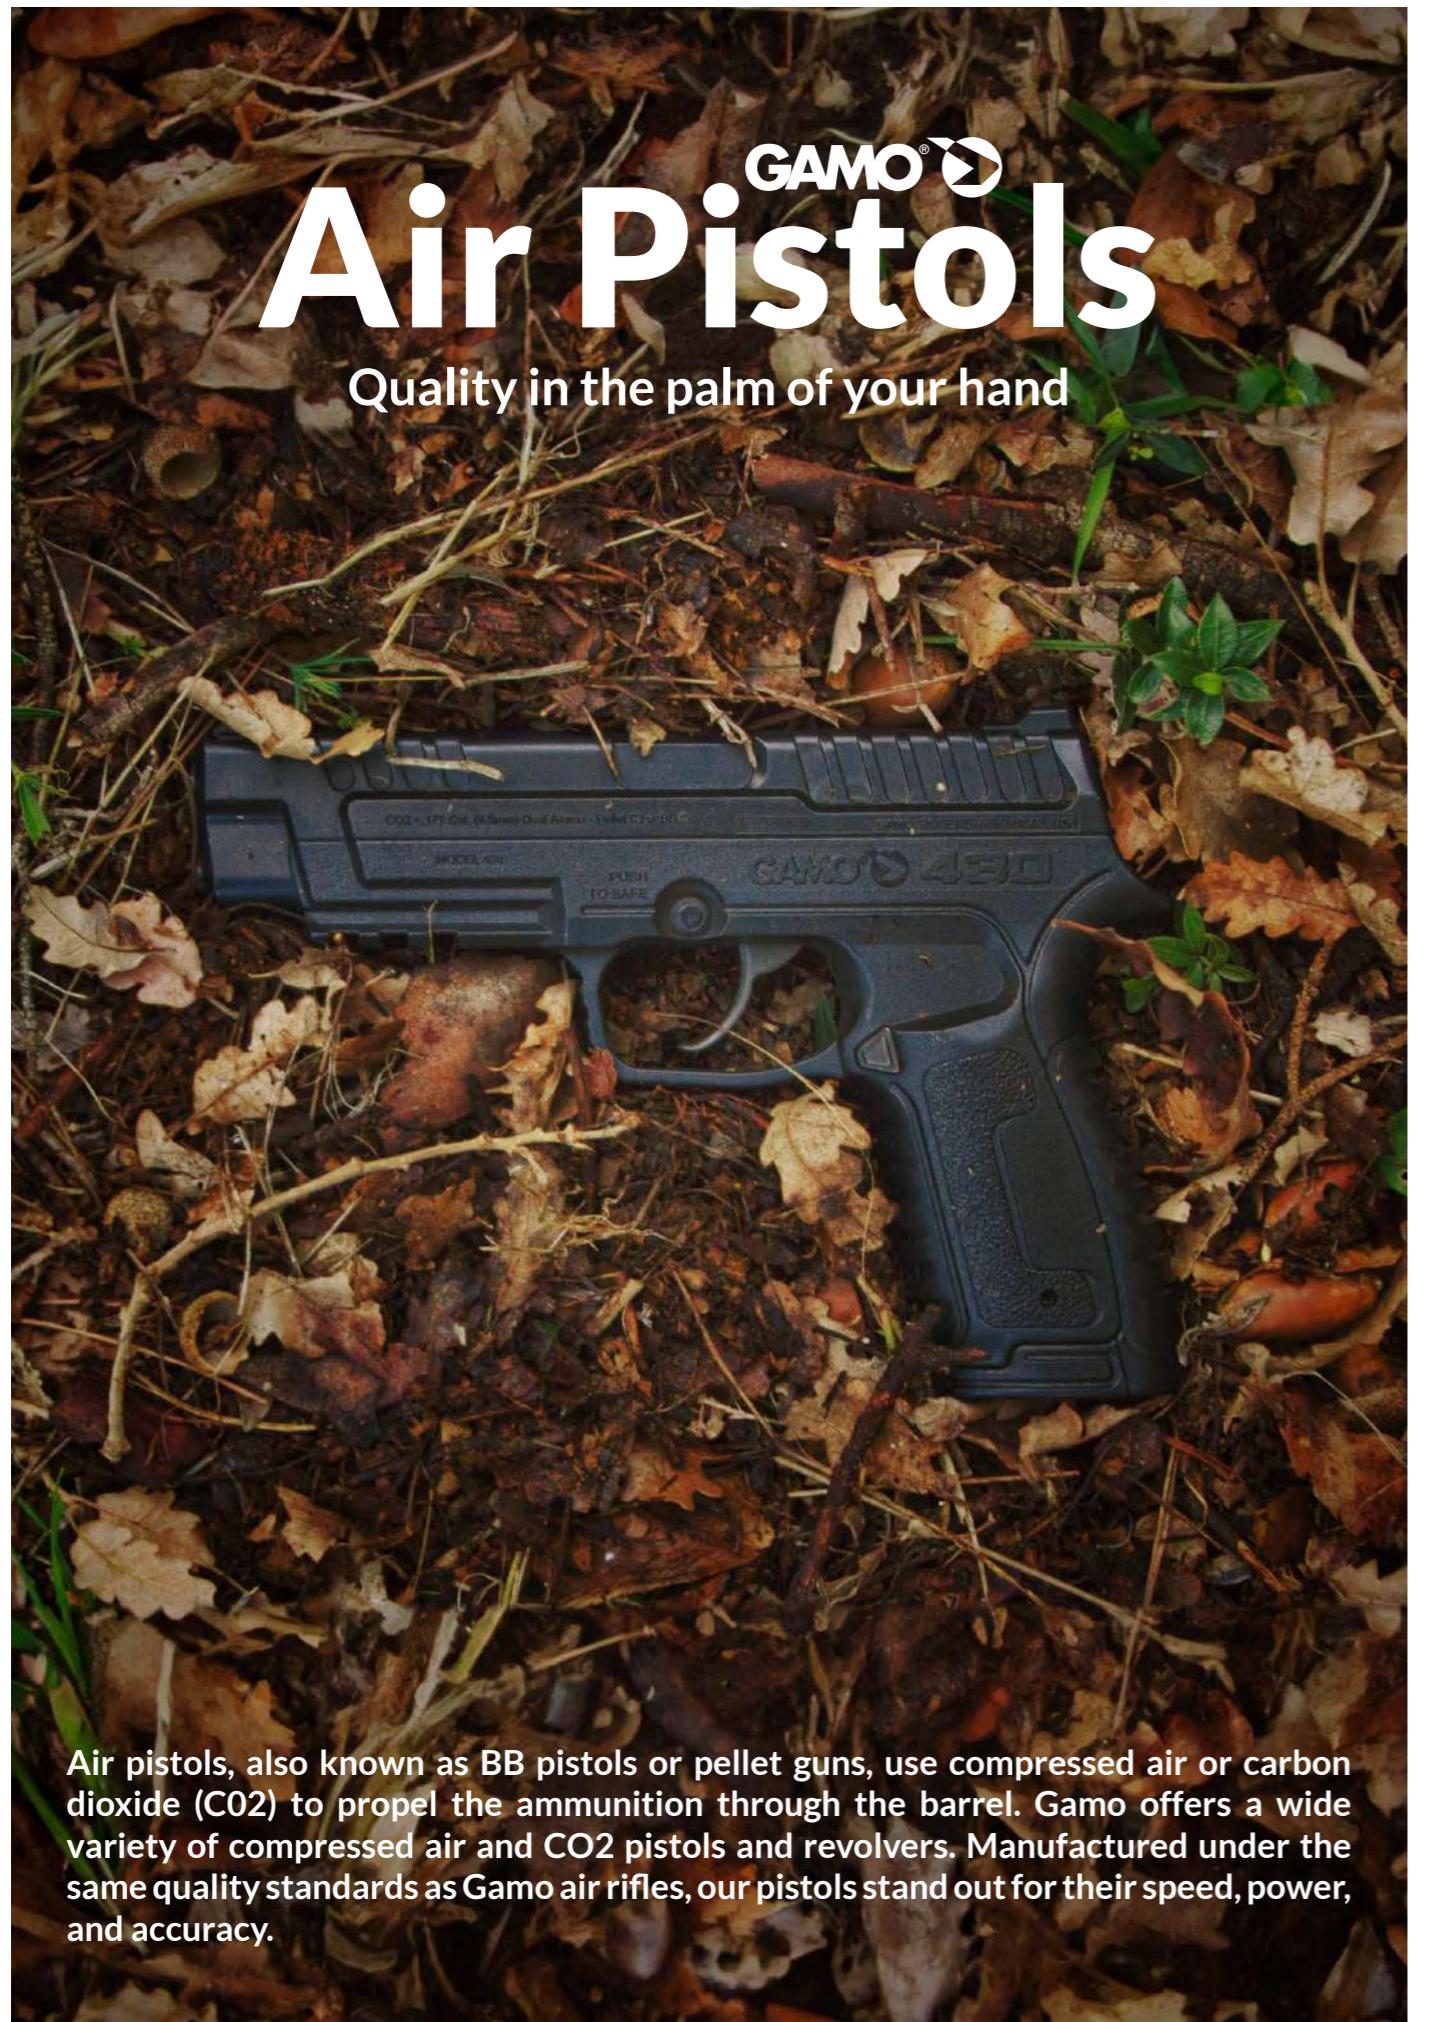

Gamo leads the way again

Gamo's Charging Point for PCP is an exclusive service designed to enhance your customers' experience with their PCP air rifles. This service ensures they have convenient access to the essential refills and maintenance their airguns require, offering reliability and ease with every use.

Be different

Becoming a Gamo Charging Point sets your business apart, placing you on our exclusive customer map and offering a service that no other competitors can match. By providing this innovative and essential service, you'll not only attract more customers but also establish your store as a go-to destination for PCP airgun enthusiasts. Stand out by offering something truly unique—become a key player in the Gamo and PCP experience.

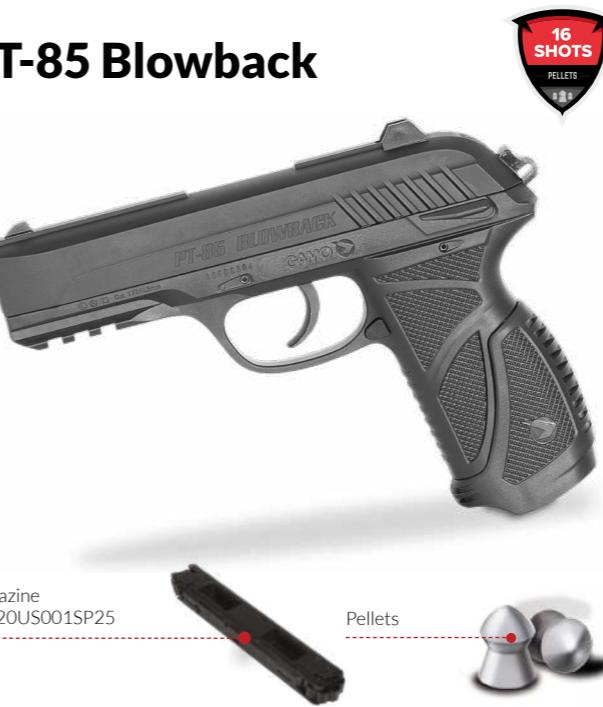

GAMO Air Pistols

Quality in the palm of your hand

Air pistols, also known as BB pistols or pellet guns, use compressed air or carbon dioxide (CO2) to propel the ammunition through the barrel. Gamo offers a wide variety of compressed air and CO2 pistols and revolvers. Manufactured under the same quality standards as Gamo air rifles, our pistols stand out for their speed, power, and accuracy.

ACCU TEK™ SERIES

Ammunition

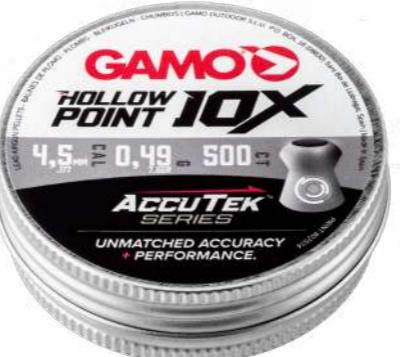

The best of the best

The new pellets, featuring AccuTek™ technology, represent a revolution in Gamo's catalog. It's not just an improvement in quality but an enhancement across the entire manufacturing process, ensuring you have the best pellets on the market.

- Excellent Quality in Every Pellet
- More Aerodynamic and Accuracy
- Maximum adaptation of the pellet to the chamber
- Enhanced production process

GAMO® Ammunition

The feed that your airgun needs

Gamo Pellets, manufactured in lead or alloy (PBA), they have different weight and design configurations in order to adapt to the needs of each shooter. Gamo is the world's largest manufacturer of pellets. Our goal is to produce the highest quality and best grouping pellets on the market. Each pellet is verified by shooting several sample units in each batch.

WINCHESTER

Air Rifles

Model X45S / X55S

7603

Cal. 4.5

29J

760355

Cal. 5.5

29J

Built on water-based varnished wooden stocks, Winchester's Models X 45 S / X 55 S stand out both for its sublime details and outstanding power. These new air rifles include a 33mm oversized chamber which provides massive power while keeping an optimum precision level. Winchester's Models X 45 S / X 55 S feature the brand's recoil dampening rail.

Model X45 / X55

7602

Cal. 4.5

29J

760255

Cal. 5.5

29J

Built on water-based varnished wooden stocks, Winchester's Models X 45 / X 55 stand out both for their sublime details and outstanding power. These brand new air rifles include a 33mm oversized chamber which provides massive power while keeping an optimum precision level. Winchester's Models X45 / X 55 feature the brand's recoil dampening rail.

Model 45 RS / 55 RS

7601

Cal. 4.5

24J

760155

Cal. 5.5

24J

Winchester's Models 45 RS / 55 RS are classic style air rifles composed of a last generation rifled steel barrel and a water-based varnished wooden stock that has been laser engraved to provide a perfect grip. These modern classics include a last generation threaded silencer and recoil dampening rail.

Model 45 / 55

760055 Cal. 5.5 24J

Winchester's Models 45/55 have been conceived as the brand's entry-level premium spring-piston air rifles. Winchester's models 45 / 55 feature an ambidextrous laser-marked stock which makes them easy to use for any shooter in the household. Ideal for target shooting and backyard plinking.

Model 11 CO2 Pistol Cal. 4.5

982011-902

Cal. 4.5

3J

There's no need to go to the range or drop a load of cash on expensive firearm ammo to experience the fun of shooting a semi-automatic pistol with blowback action. In most locations, you can shoot the Winchester Air Pistol Model 11 semi-automatic pistol at a target box indoors or in the backyard. You'll love the 1.9 lb. heft of this metal CO2 powered pistol and the realistic blowback action. Just load the 16-shot BB clip and get ready to hone your marksmanship skills.

Pellets

Flat-Nosed

Winchester's Flat-nosed lead pellets feature a flat tip pattern. This classic design has been considered the most accurate format for many years, so it has been widely used as a standard in precision competitions. The Flat-Nosed format is considered the best option for short distance shooting due to its remarkable grouping and precision.

9874152 Cal. 4.5 0.49g (7.56g)

Hollow Point

Winchester's Hollowpoint pellet presents the main virtues of the Flat-Nosed design, such as a high precision at short and medium distance shooting and at the same time offers excellent expansion capacity. This format has been developed with the aim of providing greater power of impact and penetration at lower speeds.

9874182 Cal. 4.5 0.49g (7.56g)

Pointed

Winchester's Pointed pellet can be defined as a sharp and destructive projectile, capable of offering a relentless penetration, which is really useful when practicing outdoor disciplines such as small game hunting. This type of pellet is widely used in high-powered airguns, specially conceived for varmint hunting and pest control.

9874162 Cal. 4.5 0.49g (7.56g)

Round Nose

Winchester's Round nose pellet is characterized by a rounded tip, which provides an efficient and balanced weight distribution. This particular shape also reduces wind resistance, which allows us to shoot with great precision.

9874192 Cal. 4.5 0.49g (7.56g)

Red Ryder Air Rifles

Back to our roots! New redesigned packaging for Red Ryder products now come in RETRO 1940s-style packaging that harkens back to the days of the wild West. Ride the range with Red Ryder!
