

PROGRAMMABLE LIVESTOCK FEEDERS

***A FRIEND FOR EVERY LIVESTOCK OWNER
TO HELP YOU FEED THE HERD!***

The Auto Easy Feeder is programmable to feed your livestock up to 80 times a day, if desired. You set the length of run time to determine the amount of feed dispensed. The Auto Easy Feeder can dispense different types and sizes of bulk feed, textured type feed and all cube sizes without any adjustment between types of feed. Feed is dispensed in troughs on both sides of the feeder for easy access for livestock.

The Auto Easy Feeder uses a 12 volt deep cycle battery which is recharged by a solar cell system. The programmable Auto Easy Feeder is American made and built to last. The feeder is built with heavy schedule 40 pipe, 3/16 steel, and 14 gauge steel on skids for easy moving and has a powder coated finish to stand up to the heat and cold.
