KLS09

SmartWay Verified

The KLS09 utilizes design and engineering advancements to deliver heat resistance performance and fuel efficiency.

Features & Benefits

- Reduced the tension on shoulder and bead area and a variety of groove's angles prevent stone holding problem
- Higher traction and improved wear performance to increase traction in highway service applying zigzag grooves, and prevent uneven wear by relieving rib edge stress
- Fuel efficient to enhanced rolling resistance and reduced tire weight

Application

Wheel Position

Line Haul | Regional | Mixed | Off-Road

Steer

Sizes & Specifications
