**VERNON Towel Warmers** features a wide range of designs, with many finish and size options. All VERNON Towel Warmers are made with high-quality steel, Italian heat elements, and internationally-met standards of lead and cadmium-free copper, which is also anti-bacterial, to keep your towel warmer looking pristine for years to come. Inspired by punchy graphics and airport codes of the United States, VERNON promotes modern, well-designed, towel warmers that allow you to escape to your very own retreat, each day, in style.

## WHAT TO KNOW ABOUT OUR HYDRONIC TOWEL WARMERS

Hydronic Towel Warmers are efficient, wall-mounted radiators designed with racks for towel hanging. They operate using hot water instead of electricity, offering a more energy-efficient solution for warming your towels. The absence of visible wires and no requirement for nearby electrical outlets are added advantages.

Each unit has an installation manual, simplifying the setup process. Valves and Sleeve kit are available for purchase.

To ensure safety, we highly recommend that installation be conducted by a qualified, licensed professional plumber or contractor. See page 41 for pricing and specification.

Scan the QR code or visit our website at [www.vernontowelwarmers.com](http://www.vernontowelwarmers.com) for more details.

---------------	-------------	--------------	--------	-------

### TRADITIONAL FLOOR MOUNTED VALVE SET

These ingenious, classically styled Radiator Valves are manually controlled, allowing you to find the perfect temperature. Traditional radiator valves are manufactured to the highest standards, featuring solid brass fixtures with hardwearing chrome plating and an elegant ceramic cap in the centre of the crosshead handle. With this high-quality engineering and construction, they will stand the test of time.

### PIPE SLEEVE & FLOOR PLATE KIT

A pair of 180mm high-sleeving kits can be cut down to the required length. Disguise unsightly plumbing with a carefully designed pipe sleeve and floor plate.

HSK001	POLISHED CHROME	\$148
--------	-----------------	-------

Valves and Pipe Kits are available for optional purchase.

## VALVES & PIPE KITS

# ELECTRIC & OIL-FILLED TOWEL WARMERS

Our Electric and Liquid-filled Vernon Towel Warmers come with a standard 36" plug. You may install your towel warmer using this or opt to use the hardwire kit included with each unit.

Each unit includes either a round or square hardwire kit, depending on its design. We recommend having a professional install this option.

1

Select the desired mounting position, make sure the wall is adequate to take the fixing points of the rail (i.e. anchor points) and they must be securely attached to a stud or masonry.

2

Loosely screw the wall support into the wall using the wall screw and washer. Use wall plug if you are fixing into masonry. Do not tighten fully.

3

Manoeuvre the rail back onto the bracket and tighten with the grub screw.

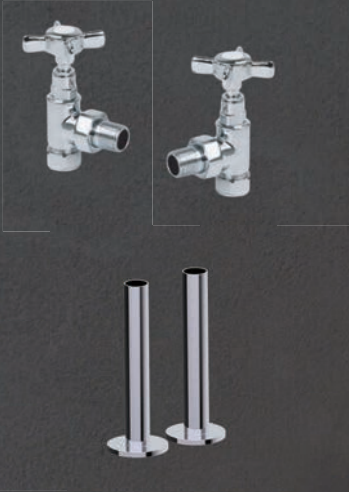

*For detailed steps, all our towel warmers come with complete instructions, or visit our website and download the mounting instructions found within each series.*

## INSTALLATION GUIDE

## NEW HYDRONIC TOWEL WARMERS

Our Hydronic Towel Warmers are energy-efficient, wall-mounted radiators that use hot water to warm towels. They come with an installation manual and valves depending on the style of the unit.

Sleeve kits are available for purchase, see page 43. It comes in 24", with custom sizes available upon request. Please contact us for more details. For safety, we recommend professional installation.

1

Unpack the Hydronic Towel Warmer and ensure all components, including the specific valve and sleeve kits, are present. Identify the location for installation, ensuring it's near a hot water source.

2

Follow the instructions in the manual to securely mount the radiator on the wall. Ensure it's level and firmly attached.

3

Connect the unit to your hot water system using the provided valve. Check all connections for leaks.

*Remember: For safety and proper installation, we highly recommend this process be carried out by a licensed professional plumber or contractor.*

## INSTALLATION GUIDE

#### **VERNON TOWEL WARMERS INC.**

#### **CARE INSTRUCTIONS AND 10-YEAR BODY, 5-YEAR ELECTRICAL WARRANTY INFORMATION:**

Thank you for purchasing your Vernon Towel Warmers.

Each of our products are manufactured with advanced technology, assuring durability, high-quality and the best design.

#### **CARE INSTRUCTIONS:**

To care for your new Vernon Towel Warmers, clean regularly with a soft, damp cloth or sponge. Do not use rough or abrasive cleaning products that may compromise your warranty. Over time, some finishes will gently age in appearance under normal use. These finishes' changes are not considered a manufacturing defect and is excluded under warranty.

#### **10-YEAR BODY, 5-YEAR ELECTRICAL WARRANTY:**

We are pleased to offer a **10-YEAR BODY, 5-YEAR ELECTRICAL WARRANTY\*** – you are eligible if the product fails due to defects in materials or workmanship. Vernon Towel Warmers have been manufactured under the highest standards of quality and workmanship. Vernon Towel Warmers Inc. warrant these products to be free from defects in material and workmanship. Proof of purchase (original sales receipt) from the original customer must accompany all warranty claims. Vernon Towel Warmers Inc. will advise you of the procedure to follow in making warranty claims. Simply contact Vernon Towel Warmers Inc., explain the defect and supply proof of purchase along with your name, address, area code and telephone number. Vernon Towel Warmers Inc.'s decision is absolutely final and without informal arbitration. Each product shipped will have a limited lifetime warranty period covered. The sole and exclusive remedy for any defect in material or workmanship under the warranty is that a new part or product shall be mailed free of charge, and postage prepaid to the party under the Warranty. Vernon Towel Warmers is not responsible for any labour charges, injuries or any other loss or damages whatsoever. Defects or damage caused by the use of other than genuine parts are not covered by the warranty. Warranty is not valid unless all amounts payable by the buyer to Vernon Towel Warmers Inc., have been paid in full (including any extras, service calls or other amounts due). Vernon Towel Warmers Inc. , does not assume any liability for any work performed by third parties. There is no warranty or implied warranty other than specified above.

#### **FREIGHT TERMS:**

Freight allowed and prepaid to all points in North America on any order over \$1,500 or more net invoice value.

#### **CLAIMS:**

Any claim for errors or shortages for which Vernon Towel Warmers Inc. is responsible must be reported within 10 days after receipt of merchandise. Claims for damaged or lost shipments must be made to the carrier.

#### **RETURNED GOODS/CANCELLATION:**

No merchandise may be returned without written consent from Vernon Towel Warmers Inc. The RGA "Returned Goods Authorization Number" must be shown on all labels and a copy of the RGA form should be included. A 25% re-stocking charge may be applicable.

Orders for modified, special order, project order or custom products, as well as those not listed in current list books, may not be cancelled or returned. Orders for all other product in current list price books may be cancelled prior to the shipment leaving Vernon Towel Warmers Inc.

Special Order Finishes (finishes other than those stocked by Vernon Towel Warmers Inc., per stocking chart) may be cancelled in 24 hours of order but may not be cancelled or returned after 24 hours of order being placed.

Vernon Towel Warmers Inc. reserves the right to give partial or no credit for the following reasons: Improperly returned merchandise, used product with no resale value as deemed by Vernon Towel Warmers Inc., merchandise has been returned after fourteen (14) days of RGA approval, merchandise did not originate from Vernon Towel Warmers Inc., or the product returned does not match the reasons for return stated on the initial RGA request to the original consumer during the life of the product. The product must be in the original installation site from the date of purchase to be considered. The original sales receipt must be provided to Vernon Towel Warmers Inc. for all warranty claims.

The warranty excludes products that have been accidentally damaged, altered, misused, normal wear and tear or damaged through use of abrasive cleaning agents. This warranty does not cover shipping costs for replacement parts, service or labour costs to replace this product. This is Vernon Towel Warmers Inc. exclusive written warranty. **Enjoy your Vernon Towel Warmers!**

# CARE & WARRANTY

**Q What is the main purpose of a Towel Warmer?**

**A** Towel warmers are an amazing product and have a variety of uses and applications. They are primarily used to heat towels and bathrobes, so they are warm when drying off after a shower or leaving the pool/beach/spa. Towel warmers also dry out wet or damp towels. This helps prevent bacteria forming and giving off that musty/moldy smell towels produce when not dried properly. Laundry loads and water consumption can be reduced as well, as the towels will not need to be washed as frequently. They help bathrooms stay warm, dry, and humidity free, while cutting down on mold and mildew. Our products can also be used as a radiator to help heat the space in which they are installed.

**Q How do Electric and Hydronic Vernon Towel Warmers work?**

**A** Hydronic towel warmers utilize central heating systems, while our Electric towel warmers have a liquid (Glycol & Water mixture) and heating element inside the unit. The heating element heats up the liquid, which cycles through the unit providing consistent radiant heat.

**Q How long will it take for the towel warmers to heat up?**

**A** Our Electric towel warmers take between 20-45 minutes to heat to its optimum temperature, depending on the size of the unit. Our MINI Towel Warmer series will take 15-30 minutes to heat up. For our Hydronic Towel Warmers, the time varies as it's contingent on the type of heating source, such as a boiler, and its distance from the towel warmer.

**Q Can I switch the element's location and hardwire kit for the Electric towel warmer?**

**A** Yes, you can switch the location of the element on the bottom of most VERNON Towel Warmers. Please refer to the instructions included with your unit to properly switch the location of the element. Please note, the units below are not able to have their element location switched:

- Tucson
- Atlantic City
- Las Vegas

**Q What certification do Vernon Towel Warmers have?**

**A** Vernon Towel Warmers are ETL certified. The ETL Mark is proof of product compliance to North American safety standard. Authorities Having Jurisdiction (AHJs) and code official across the US and Canada. The ETL Listed Mark as proof of product compliance to published industry standards.

**Q Can you install a Electric and Liquid-filled Towel Warmer outside?**

**A** The concern with installing a heated towel rack outdoors is the exposure to the elements, notably rain, snow, condensation, or ice. If there is a possibility that water can get behind the faceplate and into the electrical wiring, it can cause the unit to short circuit. If the unit is properly installed in a covered location, it could be protected and not face any problems, but installing a towel warmer outside does include some risk. The warranty will be void if the unit is installed outside.

**Q How do I properly clean my Vernon Towel Warmer?**

**A** Do not use any abrasive or chemical cleaners to clean the radiators as this will cause damage to the surface finish. Please use warm water and a damp cloth. Do not clean when hot.

**Q What is the warranty for my towel warmers?**

**A** We offer a 10-year warranty on the body of the warmer and 5-year warranty for the element.

**Q How close can I install my Towel Warmer to a tub or shower?**

**A** Please refer to your local electrical codes to ensure you are complying with all local regulations.

**Q Are replacement hardwire kits available?**

**A** Yes. While each unit includes a hardwire kit, these are also available separately if needed. Please refer to the following codes for additional purchases:

Vernon Towel Warmer Hardwire Kit Round-PC  
Code: VTW-HWK-RD-PC

Vernon Towel Warmer Hardwire Kit Square-PC  
Code: VTW-HWK-SQ-PC

**Q** What's the maximum working pressure and temperature of Hydronic towel warmer?

**A** 6 bar and 110 degrees Celsius.

**Q** What's the connection type of Hydronic towel warmer?

**A** Compression and thread.
