FEED MAGAZINE
EUROPEAN FEED BUSINESS
KRAFTFUTTER

Editorial

**Distinguished visitors, participants,
guests, exhibitors, and partners,**

On behalf of our association „European Commodities Exchange“ headquartered in Strasbourg (France), it is my great pleasure to warmly welcome you to **the 65th European Commodities Exchange 2025** — held in Berlin for the first time.

*Wilhelm Christian Plössl,
President European Commodities
Exchange – Strasbourg*

This vibrant, modern, and at the same time historic and beautiful city, with all that it represents, appears to us as an exceptionally fitting venue for hosting a European Commodities Exchange. Berlin reflects recent European history like hardly any other place — and also sharpens our view towards the future.

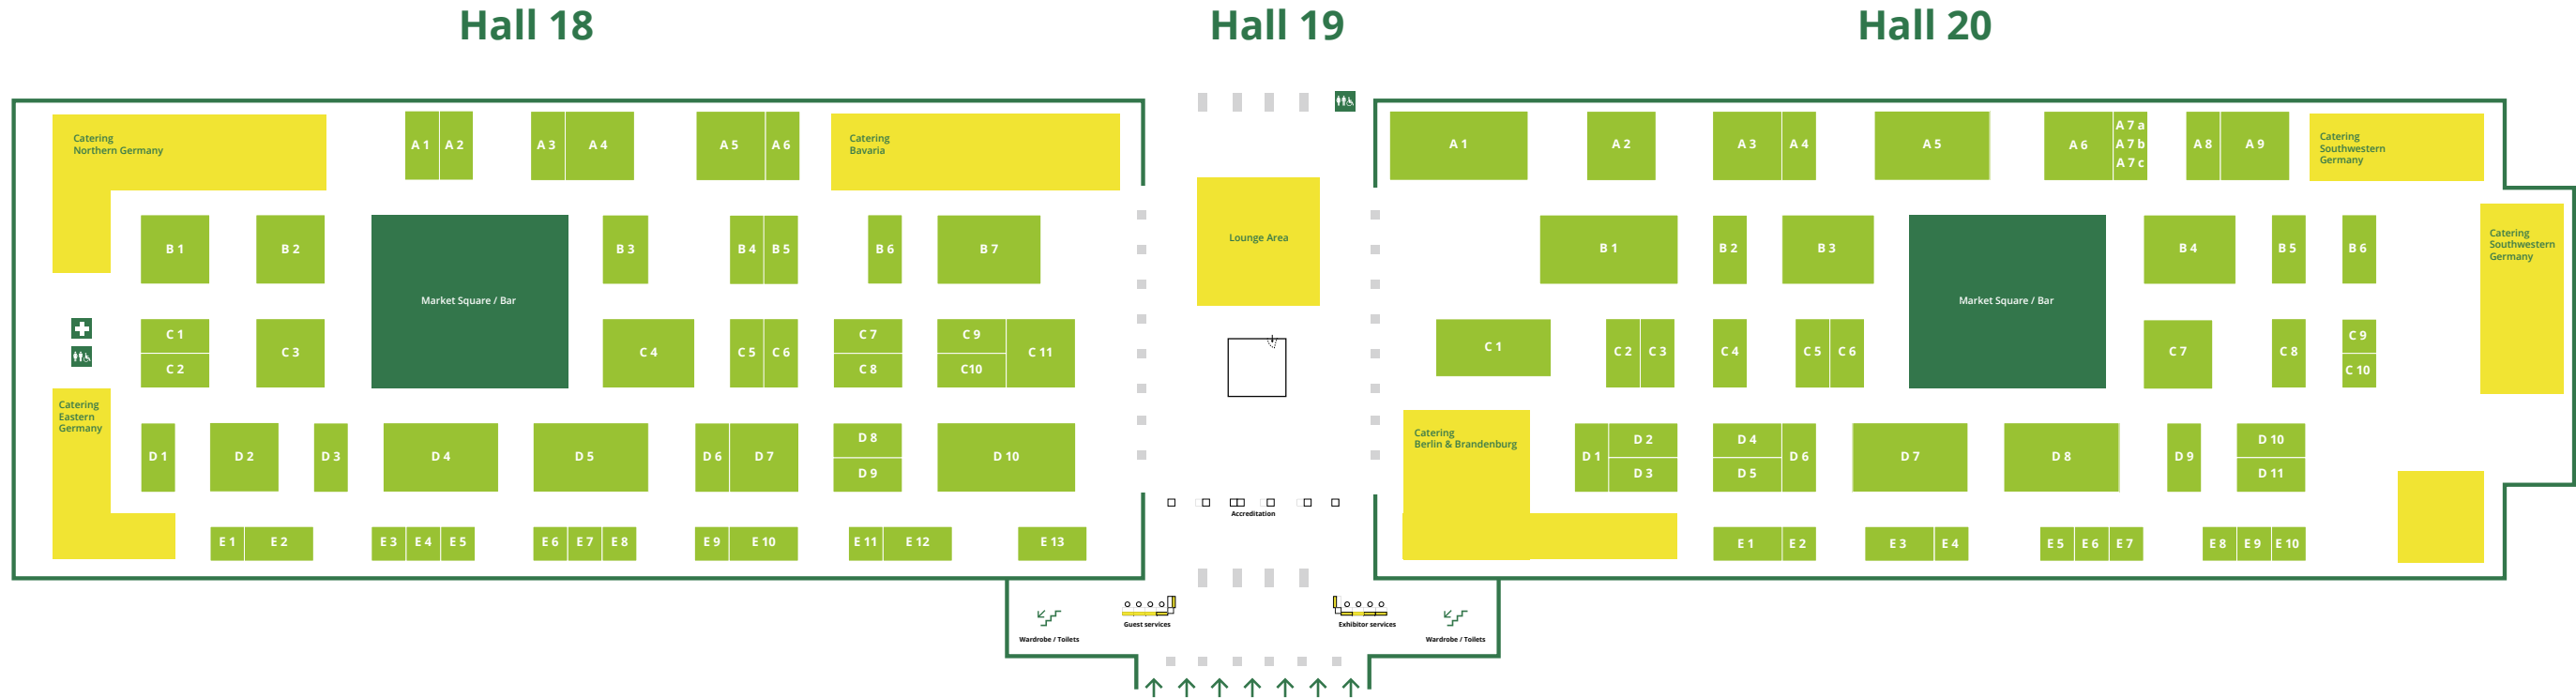

In light of global developments that give cause for concern, the notion of a free and democratic Europe as our shared home is once again moving more strongly into focus. For decades, international trade has promoted prosperity, contributed to secure peace, and helped advance humanity.

More than 3,000 participants from around the world are expected at this key industry event dedicated to grains and to raw materials for both food and feed, bringing together a wide range of processors and service providers worldwide. From the start, the purpose of this annual gathering in changing European cities has been to foster exchange, reunite, build new connections, and cultivate existing business relationships.

As President of the European Commodities Exchange, I personally wish you a successful and rewarding stay at our event, along with some beautiful and memorable moments in this remarkable city.

Wilhelm Christian Plössl

J. MÜLLER Weser GmbH & Co. KG

The J. MÜLLER Group specialises in the operation of seaport terminals and related port and shipping services. Its regional focus is on northern Germany, particularly the Lower Weser region, where it operates its own terminals in Brake and Bremen. The sixth-generation family business was founded in Brake in 1821 and operates one of the largest contiguous silo facilities in Europe. J. MÜLLER is a reliable partner for the transshipment, storage and processing of agricultural products and is a leader on the German North Sea coast in the field of breakbulk cargo such as pulp, sawn timber, iron, steel and complete wind turbines. In Bremen, the company is located at the heart of the coffee industry and has been operating the grain transport facility (GVA) since 2017. In addition to transshipment and storage, J. MÜLLER also offers freight forwarding and charter services.

HAROPA PORT

The ports of Le Havre, Rouen and Paris form the “major Seine Axis river and sea port authority” Known as HAROPA PORT. As the fourth largest north-European port, it serves a vast hinterland whose core is in the Seine valley and the Paris region forming the biggest French consumer market area. Haropa Port is also at the heart of the most productive cereals-growing regions of France. Each grain season there are around 8 Mt of cereals exported all over the world via the grain terminals in Rouen. On top of that, HAROPA PORT is hosting many agricultural product processing industries, making it one of the European leaders in this field.

The know-how of the port private operators, the reliability of the supply chain, the competitiveness of port operations and the availability of land bring lots of development opportunities to new businesses. Come and visit us at booth C07 to share your projects with us.

SENALIA

Sénalia

Sénalia, European leader in agro-logistics, based in Rouen, with operations structured around three main areas:

1. Port logistics: Sénalia manages port facilities along the Seine axis, with infrastructure dedicated to handling ships, barges, trains and trucks. Sénalia facilitates the export of cereals and other agro-industrial products through specialized terminals.
2. Bulk agro-industrial logistics: The company oversees the flow of raw materials and finished products for industrial clients, offering services such as packaging, loading, and continuous supply to production sites.
3. Warehousing and logistics services: Sénalia operates several storage sites (75,000 m²) in Rouen (rack and bulk). Sénalia plays a key role in the agro-industrial logistics chain, with a strong focus on innovation, quality, and reducing environmental impact, particularly through shared river transport solutions.

Cereal Docks Spa

Cereal Docks is an Italian industrial group active in agribusiness first processing, for the production of ingredients (flours, oils, lecithins) derived from oilseeds and cereals for applications in the feed, food, pharmaceutical, cosmetic, and technical sectors.

It is headquartered in Camisano Vicentino (VI), where Mauro and his cousin Paolo Fanin founded the company in 1983, a successful example of a family business. Over the years, the group has dedicated itself to diversifying its offerings and developing new business areas.

Since 2021, Cereal Docks has been a Benefit Corporation, increasingly focused on developing sustainable and healthy products that safeguard the health of people and animals, while ensuring high standards of quality, safety, and environmental responsibility.

PORT OF RAVENNA

Port of Ravenna Authority

The Port of Ravenna is a multipurpose port and an intermodal platform offering high value-added logistics services, equipped with port terminals with direct connections to the road and motorway network and to the national railway network.

Due to its strategic geographic position it serves Northern Italy and Central Europe and is a key port for the Eastern Mediterranean and Black Sea markets. It also plays an important role in trade with markets in the Middle East and Far East. Its inclusion in the comprehensive road system and its connection with the most important transport networks makes the Port of Ravenna an accessible hub from the main Italian and European markets, indeed it is included among the Core Ports of the TEN-T networks, and is part of both the Baltic-Adriatic Corridor.

Relevant investment and projects are following the path of a greener, sustainable, smart and digitalized port.

North Sea Port

North Sea Port is European leader for the storage and distribution of cereals, derivatives and oilseeds. North Sea Port has a unique total dry bulk storage capacity of 2.2 million tonnes at its disposal and every year 7 million tonnes of agribulk (sea and inland) are distributed to its hinterland.

The 2.2 million tonnes of storage possibilities enable us to store (dry) agribulk in the short and long term, which is ideal for arranging the retail distribution. Storage is possible at various (waterfront) locations in the port, both in horizontal and in vertical silos. The silos are equipped for storing grain, derivatives and oilseeds such as linseed, rapeseed, soybeans, wheat, barley, sorghum, rye, rice, maize, beet pulp, palm, etcetera.

Goods can be imported and exported by sea, inland waterways, rail and road. For grain, derivatives and oilseeds, North Sea Port has trade partners all over the world: Brazil, Uruguay, Canada, Australia, India, France, Spain, Ireland, Ukraine, Romania and the Baltic region. The grain, derivatives and oilseeds handled by North Sea Port are intended for three markets: 'food' for human consumption, 'feed' for cattle and animal feed and 'fuel' for biofuels and products in the biobased economy. Half of the products are intended for local production in Belgium, the other half is distributed to surrounding countries such as the Netherlands, Germany and France.

This position as a European distribution platform has been further developed in the past few years. In North Sea Port, various players are active as far as agribulk is concerned. North Sea Port can be called the granary of Europe. Moreover, North Sea Port is again the biggest dry bulk port of Belgium.

PORT OF BILBAO

The Port of Bilbao is one of the main logistics hubs in northern Spain and a key infrastructure for agri-food trade. It has modern facilities for handling solid and liquid bulk cargo, enabling agile, safe, and efficient operations. It is committed to intermodal distribution towards the main consumption and production centers in inland Spain and Europe, which enhances the port's competitiveness. At the same time, Bilbao is a benchmark port in terms of sustainability, and projects focused on decarbonising the port are underway and growing. One such initiative is the electrification of the docks using OPS technology, which will contribute to a 40% reduction in emissions from vessels during their stay in port. The first phase of this project, is already underway, and will be completed in 2026. The second phase will start in 2025 and finish in 2027. Part of the energy to be consumed will come from renewable sources, such as an array of PV solar panels.

PannoniaBio Pannonia Bio Zrt.

Pannonia Bio — Redefining Animal Nutrition for a Sustainable Future

In a challenging era of rising costs, supply chain volatility, and environmental pressure, Pannonia Bio delivers smart, science-driven feed solutions that empower farmers and strengthen livestock health.

Through advanced biorefining, we convert corn and barley into highly digestible, protein-rich ingredients — guaranteed GMO- and antibiotic-free — that reduce reliance on costly imports like soybean meal.

Our product range (DDGS, Barley Protein Concentrate, Corn Protein Concentrate, Barley Husk and others) offers versatile and high-quality feed options tailored for modern production.

Premium Sustainable Feed Ingredients – From One of the World's Most Advanced Biorefinery

Our Feed Solutions

Pannonia Gold (DDGS)

Energy-rich corn DDGS with >33% digestible protein. GMO- and antibiotic-free, consistent quality, suitable for all livestock.

Pannonia Barley Protein Concentrate

Barley Protein Concentrate ($\geq 60\%$ protein). Proven performance in piglets and livestock. Sustainable, GMO-free alternative.

PannoniaBio

Fueling tomorrow, feeding change.

Pannonia Bio operates Europe's largest and most advanced grain biorefinery, based in Hungary. We are committed to delivering sustainable, innovative feed solutions that support animal performance and promote a circular bioeconomy.

Pannonia Barley Husk

High-fiber pelletized bran. Improves feed texture and digestibility, with stable, GMO-free quality.

Pannonia Barley Wet Fiber

Wet barley fiber rich in digestible fiber. Long shelf life, safe, and ideal for cattle and pigs.

Inerco Trade SA

Inerco Trade SA is the Swiss trading arm of KERNEL, the world's leading producer and exporter of sunflower oil. Powered by KERNEL's integrated Black Sea platform, we connect Ukraine to global demand across 60+ countries. KERNEL's scale spans four core segments: oilseeds crush, grain exports, infrastructure & logistics and farming. This is underpinned by modern export terminals, crushing plants, rail assets, and inland storage in Ukraine. Inerco translates this industrial footprint into market access and risk-managed solutions for buyers worldwide. We offer competitive pricing, quality assurance, and end-to-end logistics to ensure reliable execution. Together, KERNEL and Inerco strengthen global food security by linking Black Sea farmers and crushers with international consumers: reliably, responsibly and at scale.

FNPSMS

The FNPSMS (French National Federation for Maize and Sorghum Seed Production) is the interbranch organization that brings together all stakeholders involved in maize and sorghum seed production in France: seed companies and seed-producing farmers.

Our common objective is to manage French production from a technical and economic perspective, to contribute to its development both in France and abroad, and to represent the sector before French and European authorities.

Maize seed producers are grouped into 31 local or regional producer organizations, federated.

The 31 seed companies, including breeders and contractors, are federated within the maize and sorghum section of the UFS (French Seed Union).
