## SAFETY

# Raise and Lower Change Table

An Australian  
Innovation

- Decrease chance of back injury for staff
- Children love it & want their nappy changed!
- Only requires 1 x standard electrical outlet
- It's portable: doesn't affect 'Licensed Place Capacity'

100% Australian Made  
Model: JK100

### Steps to use:

- Lower the change table to the floor using the simple control unit or remote control
- Open the easy to operate front doors  
Children love to climb in!
- Close the doors (they automatically lock when closed)
- Raise the table to a working height that is most comfortable for your educators
- Ask the child to lay down on the mattress of the change table - open the doors
- Change the child and close the doors
- Lower the change table to the floor
- Open the doors and the child can depart the change table

### Features:

- Mains power operated, raise and lower function
- Low height of 23cm, raised height of 88cm
- 12 seconds lift speed
- 60kg Safe Working Load
- 30kg max child weight
- Lockable castors
- Expanding safety skirt fitted to prevent access under the table
- Child Safe Bump stop feature
- Clear sides and doors for easy supervision.
- Easy to clean
- Remote controlled as well as fixed control panel
- Internal size 65 cm x 77 cm
- Clip on wire basket for nappies/wipes

### Consider the cost of a staff member back injury:

- Time off work
- Medical costs
- Dealing with WorkSafe
- Return to work plan

### 2024 WorkSafe Awards finalist

We are proud to announce we have been shortlisted as finalists in the category 'Workplace Health and Safety Solution of the Year'.
