

How to Access Forms/Documents in the Patient Portal

All forms can be found in the “Documents” section on the patient portal

When you log in to the portal, first select the child you are looking for and proceed to the “Documents” tab on the left side.

Once you have opened the documents section you will see all of the previously requested documents for your child. You can scroll through the list and select the document that you want to view/print and it will open as a PDF.
