

Specialized Hematology Care for Pregnancy and Beyond

FOR OB/GYNS:

Professional support for your patients when it matters most. Pregnancy and women's health bring unique hematologic challenges. At Brodsky Hematology, we partner closely with OB/GYNs to provide prompt, thoughtful consultations, ensuring the best outcomes for both mother and baby.

We provide:

- Iron Deficiency Anemia Diagnosis & Treatment
- Specialized care, including IV iron therapy for faster recovery and improved maternal health.
- Coagulation and Thrombosis Management
- Comprehensive management of clotting concerns during pregnancy and postpartum.
- Infertility and Pregnancy Loss Support
- Evaluation for clotting disorders that can impact fertility, with tailored anticoagulation management plans.
- Pre-Delivery Optimization
- Ensuring healthy blood counts to support safer, smoother deliveries.

We help with:

- Severe fatigue or weakness due to low iron
- Need for IV iron treatments to boost health during pregnancy
- Concerns about blood clots during or after pregnancy
- History of miscarriages or infertility possibly linked to blood disorders
- Preparing for a safe delivery with strong blood counts

At Brodsky Hematology, we understand how important every step of your pregnancy journey is — and we're here to support you with clear answers, compassionate care, and proactive solutions.

Expecting a Baby?

Struggling with anemia or clotting issues? Brodsky Hematology can help.

Healthy blood means a healthier pregnancy. If you're facing anemia, have had blood clots, or have experienced pregnancy losses, Brodsky Hematology provides the expertise and personalized care you need to move forward with confidence.

Talk to your OB/GYN today and ask for a referral to Brodsky Hematology.
