

The Next Generation of Infusion Care

Brodsky Hematology Affiliate

NextGEN Infusions by Brodsky Hematology is a state-of-the-art Center of Excellence dedicated to delivering the highest standard of infusion care. Designed with both clinical precision and patient comfort in mind, our facility offers an advanced, modern environment where safety, efficiency, and compassion come together. From streamlined workflows to expertly trained staff, every aspect of NextGEN reflects our commitment to elevating the infusion experience and setting a new benchmark for outpatient infusion therapy.

Referring physicians can rely on us as a trusted and reliable partner. We offer streamlined workflows, rapid scheduling, minimal wait times, and clear, timely communication throughout each patient's treatment course. As the **next generation of infusion care**, we are redefining what an infusion center should be—returning the focus back to the patient. Our model emphasizes comfort, personalization, transparency, and efficiency, creating an environment where patients feel genuinely supported rather than processed through a system.

We offer a full range of infusion services including:
