SINCE 1937

POWDERED RESIN WOOD GLUE

 **VERY STRONG**

 **WEATHER PROOF**

 **INTERIOR EXTERIOR**

UREKA THE NAME THAT STICKS

CASCAMITE

POWDERED RESIN GLUE

Cascamite is the original single component powdered urea-formaldehyde resin glue, which, when mixed with water, provides a gap filling water resistant adhesive unaffected by moulds and fungi. Cascamite only requires mixing with water to make it ready for use. It is a weatherproof adhesive which can be used for interior and exterior joinery.

Available Sizes

Packaging	Weight	Coverage
Pail	125g	8 sqm per kg
Pail	250g	
Pail	500g	
Pail	1.5kg	
Pail	3kg	
Pail	6kg	
Pail	25kg	

Colour

Uncured	Cured
White powdered	Opaque liquid

Cure Time

10°C	15°C	20°C
8 hours	5 hours	3 hours

Key features

Long open time

Easy to use

Strong creep resistant bond

Weatherproof
C3 rated

Can be mixed in small batches

CASCAMITE

ACCELERATOR

Cascamite Accelerator is a hardener used with Cascamite Powdered Resin Wood Glue. This accelerator increases the cure speed of the mixed glue to handling strength in approximately 25 minutes at 20°C. Ideal for use when you have urgent jobs or small assembly joints which need further processing in a quick frame time.

Available Sizes

Packaging	Weight
Bottle	250ml
Bottle	1L

Cure Time with Cascamite

10°C	15°C	20°C
25 minutes	12 minutes	6 minutes

Key features

Accelerates curing

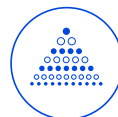

Water resistant

Very strong bond

Easy to apply

Interior & exterior use

CASCAREZ

LIQUID RESIN GLUE

Cascarez is the ultimate fast grab wood adhesive. The high solids content ensures that it's the fastest, strongest adhesive of its type. Used correctly it will bond most woods in 10 minutes and be ready to handle in 30 minutes. Cascarez bonds stronger than the wood itself in less than 2 hours.

Available Sizes

Packaging	Weight	Coverage
Bottle	125ml	5-7 sqm per kg
Bottle	250ml	
Bottle	500ml	
Bottle	1L	
Jerrican	5L	
Jerrican	25L	

Colour

Uncured	Cured
White Liquid	Clear

Cure Time

15°C	20°C	25°C
40 minutes	15 minutes	10 minutes

Key features

Highly water resistant
D3 rated

Bonds in 10 minutes

Very strong bond

Bonds most wood substrates

Cures clear

CASCAPHEN

WATERPROOF RESIN GLUE

This two part glue has been specially developed for waterproof exterior use. Developed for the marine industry, this is the only completely waterproof adhesive that will withstand continual immersion in water. For use externally where extreme weathering will take place, and manufacture of load bearing timber structures.

Available Sizes

Colour	Weight	Coverage
Brown	670g kit	8 sqm per kg

Cure Time

70°C	80°C	90°C
11 hours	8 hours	3 hours

Key features

Fire rated (class 0)

100% Waterproof

Exceptional bond strength

Excels in structural applications

Can be fully submerged in water (WBP Grade)

CASCAPUR

FAST CURE PU GLUE

Cascapur can be used for many applications where gap filling properties, high strength and a high level of water resistance is required. Cascapur has been successfully used for bonding many types of woods, plastic foams and other insulating materials to a wide variety of both rigid and flexible facing materials.

Available Sizes

Packaging	Weight	Coverage
Bottle	125 ml	12 sqm per ltr
Bottle	250 ml	
Bottle	500 ml	
Bottle	1L	

Colour

Brown

Cure Time

15°C	20°C	25°C
30 minutes	20 minutes	10 minutes

Key features

Gap filling (medium foaming)

Bonds in 10 minutes

Bonds non-porous substrates (thermally modified timber)

Bonds a range of substrates

Very strong bond

CASCAMATE

MITRE BOND KIT

Cascamate fast cure mitre bond kit comprises of a high viscosity superfast cyanoacrylate adhesive and an aerosol containing activator. It is designed for the bonding of a wide range of plastics, rubbers, timber, metal components, fabrics, ceramic, leather and 'difficult polymers'. Usually achieves bonds stronger than the material itself.

Available Sizes

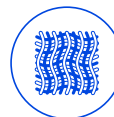

Colour	Weight	Cure Time
Clear	250ml kit	30 seconds

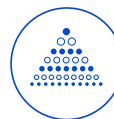

Key features

Super fast curing

High viscosity

Bonds plastics and rubbers

Resistant to moisture

Non - Staining
(Apart from PVC)
