

Program Guidelines and Compliance Requirements

» MAGNET RMP

Aerial application of Magnet Insect Attractant Technology plus a registered insecticide (Magnet RMP) is an option that is available to certain Bollgard 3 cotton growers to improve their ability to comply with the Bollgard 3 RMP by removing the need for pupae destruction.

In addition, the Magnet RMP option provides several other benefits to cotton growers. However, continued availability of this technology requires strict compliance to the requirements for using Magnet RMP under the Bollgard 3 RMP.

» COMPLIANCE REQUIREMENTS

Compliance requirements include:

- ✓ Cotton growers must opt in via their Bollgard 3 Technology Service Provider (TSP) between 12 January 2026 and 31 January 2026.
- ✓ Three applications of Magnet RMP must be applied weekly, no earlier than 10 February 2026 and no later than 1 March 2026.
- ✓ Applications must be made by a Magnet RMP accredited aerial operator according to label directions.
- ✓ Magnet RMP applications must be traceable and recorded in the MTrack system.

» PROCESS RESPONSIBILITIES

Over the page is the process for this year's Magnet RMP program, including compliance aspects and responsibilities of each stakeholder.

Be sure to read the **Bollgard 3 RMP** for all other aspects of compliance.

Magnet RMP for the Bollgard 3 Resistance Management Plan (RMP)

COTTON SEASON 2025 / 26

PROCESS RESPONSIBILITIES

Process per field	When	Where	Responsibility*
1 Opt in window for Magnet RMP fields (changes are permitted during this period)	12 to 31 January 2026	MTrack	TSP
Include accredited Aerial Operator name when opting in		MTrack	
Magnet RMP deliveries occur	15 January to 20 February 2026	To Aerial Operators (and TSPs in some circumstances)	AgBiTech
2 List of opt in fields sent to growers, TSPs and Aerial Operators	2 to 6 February 2026	Via email	AgBiTech
3 Magnet RMP spray orders sent to Aerial Operators	9 February to 1 March 2026	Via email or other communication	Grower or grower's agronomist
4 3 x weekly Magnet RMP applications occur	10 February to 1 March 2026	Opted in fields	Aerial Operator
5 3 x Magnet RMP spray completion reports sent to relevant TSPs	10 February to 1 March 2026	Via email	Aerial Operator: direct to TSP or via grower
6 3 x Magnet RMP spray completion reports uploaded to MTrack	2 March to 15 March 2026	MTrack	TSP
If 3 applications aren't completed during the required period or any application is incorrect, notify your Bayer representative			TSP

* TSPs are responsible for ensuring Bollgard 3 RMP compliance information is complete and uploaded to MTrack on behalf of the Bollgard 3 growers they represent.
