NOW FOR SHEEP AND CATTLE

The power of orange.

Is your drench really working?

Evidence of resistance in major worm species was detected in 43% of 197 DrenchChecks completed by Elanco between 2022 and 2025.¹

Scan for full results

With widespread resistance to older single, double and triple sheep drenches^{1,2}, it's time to switch to the power of Zolvix™ Plus. This unique drench delivers the power of monepantel, the only member of the 'orange' drench class³, in combination with abamectin. Monepantel's unique mode of action provides >99.9% efficacy against a broad spectrum of internal parasites in sheep, including single, double and triple resistant strains.^{4,5,6} Contact Elanco or your rural supplier and put the power of orange to work in your worm control program.
