DISBURSEMENTS

Disbursements are items arranged for and possibly paid for on your behalf by the transfer service to third party providers. Such items include but are not limited to:

Cremation Fee - This fee is charged by the crematorium for the cremation of the body. The fee varies by crematorium.

Alkaline Hydrolysis Fee – This fee is charged by the hydrolysis facility for the hydrolyzation (aquamation) of the body.

Coroner's Fee - This is a provincially set fee charged by the coroner for issuing a certificate that allows cremation or alternative disposition or 'Out of Province' shipping to take place.

Interment Fee - This fee is charged by the cemetery for the opening and closing of the grave. The fee varies by cemetery and by the size and depth of the grave.

Municipal Death Registration Fee - This is a fee charged by the local municipality to register the death on behalf of the Province of Ontario. The municipality issues a burial permit, then forwards the registration documents to the Office of the Registrar General in Thunder Bay.

Media Notices - These are charges for death notices in newspapers, radio stations or other media outlets. Arrangements must be completed prior to verification.

CASKET SELECTIONS

These products are all suitable for cremation. Delivery fees and shipping fees extra.

The following caskets listed are those generally available. Additional options are available upon request. Unless otherwise noted, all caskets listed are standard adult size.

Minimum requirements for a casket:

For Burial – the least expensive wood casket is suitable and is required by most cemeteries' by-laws for interment, in the interest of the health and safety of the workers involved in the interment process. A metal casket may also be used for burial. A growing number of cemeteries in Ontario offer "green" burials, which may consist of interment of a body without a casket. Since there is no legal definition for a "green" burial, it varies from one cemetery to another.

For Cremation – a body must be presented to the crematorium in a rigid, leak-proof casket that is made of a combustible material, such as wood or cardboard. Caskets containing non-flammable, hazardous material or chlorinated or fibre-reinforced plastic, other than incidental metal, cannot be used for cremation. We offer a selection of inexpensive caskets below that are suitable for cremation. For hydrolysis: a casket is not used for hydrolysis (also known as "aquamation"), but a shroud is required for transport of the body. In some circumstances, a hydrolysable container or wrapping may also be required.

For more information on this alternative method of disposition, please speak with one of our licensees, or refer to the Bereavement Authority of Ontario's Consumer Information Guide.
