

# Grow Your Business with Respiro's CO/PRO

The **CO/PRO**  
Delivers Dual Zone  
Protection!

Don't just detect.  
**PROtect.**

**R**espiro's **CO/PRO** is a professional carbon monoxide (CO) PROtector. It monitors CO levels produced by fuel-burning devices (e.g., furnaces, water heaters, etc.) in the ventilation and ambient air. If CO is detected, **CO/PRO** turns off the fuel-burning devices to stop the spread of CO through the home.

Provided exclusively through HVAC and plumbing wholesalers/distributor channels, the **CO/PRO** enables professional HVAC and plumbing service companies to deliver proactive carbon monoxide protection.

The importance of air quality has increased as people are working from and staying inside their homes more. Low levels of carbon monoxide can leak from furnaces, water heaters, and their respective exhaust systems at any time, which can be undetectable by regular CO detectors. Long-term exposure to low levels of CO can cause symptoms that can mimic many different illnesses and diseases.

#### **CO/PRO KEY FEATURES:**

- Dual Zone Low-Level CO monitoring
- Works with all 24V controlled fuel burning devices
- PROfessionally installed
- 24/7/365 PROtection
- Up to 7-year sensor life
- Replaceable UL-rated sensor
- Audible alarm and visual indicators
- 24 VDC powered
- CE, RoHS
- Patented operation
- 5 year warranty
- Manufactured in the USA!

# SPECIFICATIONS

**Power:**  
18–28 VAC, 7.2 VA max  
18–40 VDC, 180 mA max

**Relay:**  
Dry SPDT (Form C)  
2A at 24 VAC/DC, resistive  
140 VA inrush  
48 VA holding at 24 VDC

**Carbon Monoxide Alarm level:** 25 ppm

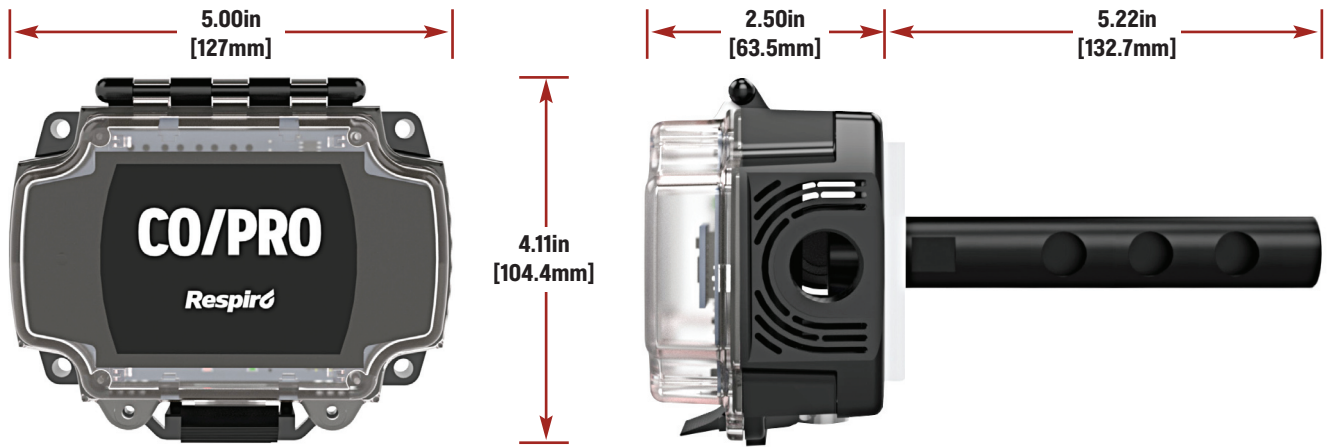

**Response time:**  
< 80 seconds from 10% to 90% of range

**Accuracy**  
+/- 3% FS, 32° to 122°F (0 to 50°C)

**Environmental Operation**  
14° to 122°F (-10° to 50°C) / 5 to 95% relative humidity, non-condensing
