

STRILING RANCH – BOARD UPDATE

February 10, 2026

Dear Homeowners:

We all know that wildfires are a real threat across the country and especially in Colorado. Your Board has been discussing ways that we can mitigate the risk of having a wildfire here and, should one occur, mitigating the damage it might cause. To that end, we are exploring becoming certified as a “Firewise Community.” You can find more info on Firewise Communities [here](#) (link also below).

Link: <https://www.nfpa.org/education-and-research/wildfire/firewise-usa/firewise-usa-resources>

There are many benefits to being a Firewise Community including: access to tools and resources to help reduce wildfire risks, potentially reduced insurance rates for the community and individual homeowners, and access to matching funds to help offset the costs of becoming more fire wise.

The first step in this process is to form Fire Committee. Our resident expert, Gregor, has agreed to lead this effort. Sandy has also agreed be on the committee. Please let Gregor or Sandy know if you are interested in participating.

Thanks, as always, for your support.
