

ENVIRONMENTAL PERFORMANCE

Our company is our product - ProCleanSorb. The environmental performance of our product has been proven in laboratory testing. It has been shown to eliminate 99% of copper in water, to eliminate diesel in water, be non leaching, bioremediation. Not only is our product helping to clean contaminated water, it also protects the environment during construction.

Pro-Earth is the sole supplier of ProCleanSorb products throughout the UK, EU & MENA.

ProCleanSorb – its qualities

- Made from a totally natural and sustainable plant resource
- Hydrophobic (repels water)
- Absorbs and encapsulates almost all hydrocarbons and their vapours
- Adsorbs heavy metals
- Non-leaching – provides an environment for naturally occurring microbes that recycle hydrocarbons and chemicals until they become less toxic or non-toxic
- Heavy metals will not leach
- Safe to handle in its natural state
- Versatile – for use on land or in water

ProCleanSorb – benefits

- Enables the safe discharge of water
- Substantially reduces the amount of hazardous waste disposal
- Decreases incidents of pollution caused by contaminants leaching back into the environment
- Keeps our domestic drainage systems clear of unwanted fats, oils and greases.

ProCleanSorb is effective on all these contaminants
