

AN AMERICAN BULLFROG'S HOME

Bullfrogs are native to ponds and swamps across the eastern United States. In this challenge, you will design a bullfrog's perfect habitat by drawing and coloring it below. The habitat should include...

- Shallow, slow-moving water
- Protected area with eggs and tadpoles
- Several males competing
- Vegetation to hide
- Food items for tadpoles and adults
- Female looking for a mate

AN AMERICAN BULLFROG'S HOME

Read each question below and discuss your answers as a group.

1. Describe the tadpoles in your drawing. Describe the adult frogs in your drawing.

2. How do the tadpoles and adult frogs look different?

3. What do the tadpoles have that would help them survive in water?

4. How do the male and female frogs look different?

5. What parts of the habitat are good for tadpoles?

6. What parts of the habitat are good for adult frogs?
