

# Color Confusion

Draw & color each animal and its environment in the box. Use the questions to discuss the pros and cons of having color mutations.

White Tiger

1. Is this animal albino, leucistic, or melanistic? Why?
2. Would having white fur make it more challenging to survive in the wild? Why?
3. How could this animal change its behavior to have a better chance of survival?

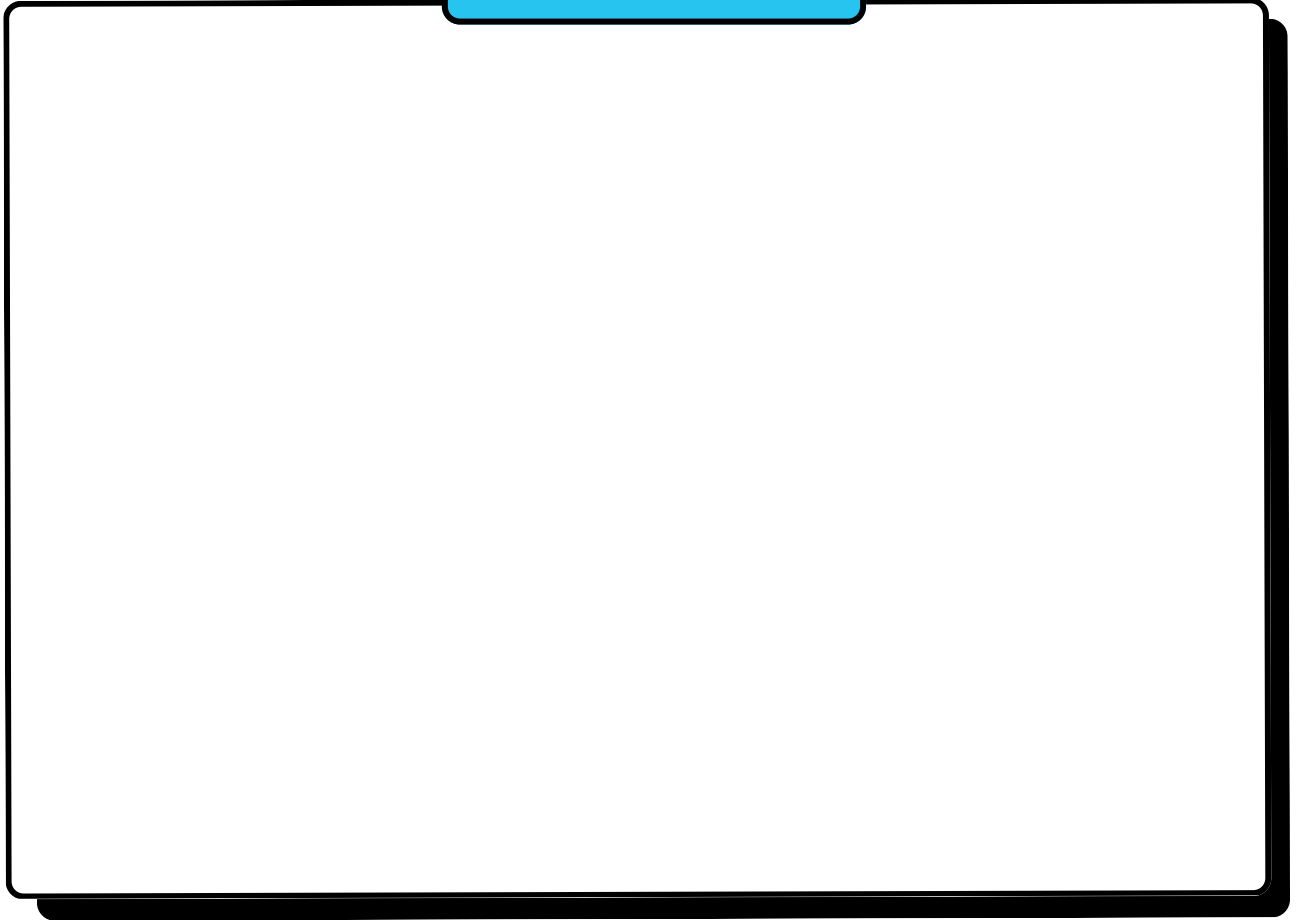

# Color Confusion

Black Panther

1. Is this animal albino, leucistic, or melanistic? Why?
2. Would having black fur make it more challenging to survive in the wild? Why?
3. How could this animal change its behavior to have a better chance of survival?

# Color Confusion

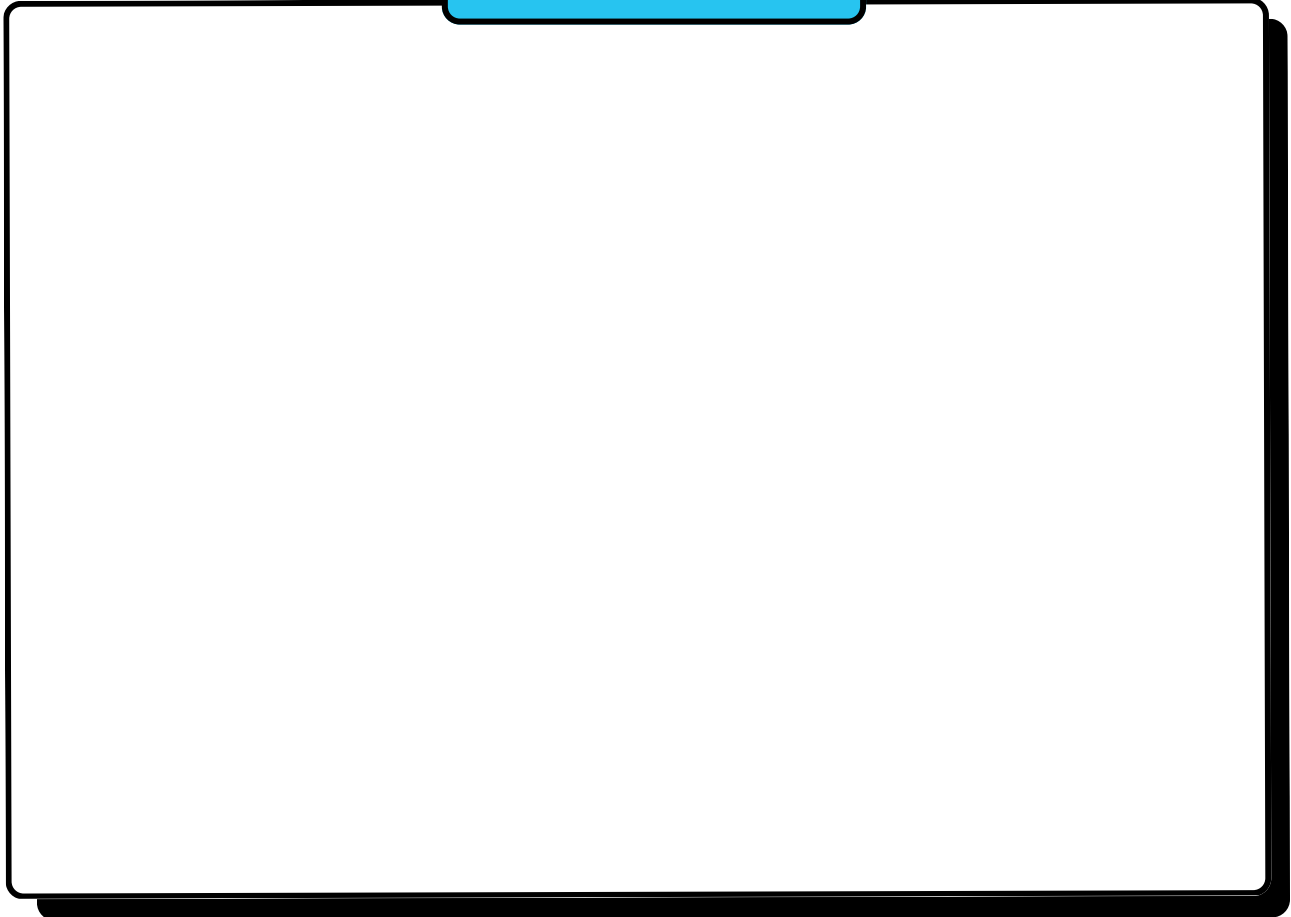

Albino Alligator

1. Is this animal albino, leucistic, or melanistic? Why?
2. Would having white scales make it more challenging to survive in the wild? Why?
3. How could this animal change its behavior to have a better chance of survival?

# Color Confusion

Black Squirrel

1. Is this animal albino, leucistic, or melanistic? Why?
2. Would having black fur make it more challenging to survive in the wild? Why?
3. How could this animal change its behavior to have a better chance of survival?
