KINGFISHER CHALLENGE

Materials:

- Pen or pencil
- At least 3 pieces of paper
- Markers and other coloring utensils
- Scissors

Instructions:

Kingfishers are skilled divers. Their bodies travel smoothly through air and water. When they spot a fish, they must act quickly before the fish escapes.

In this challenge, you will explore a kingfisher's dive using paper airplanes.

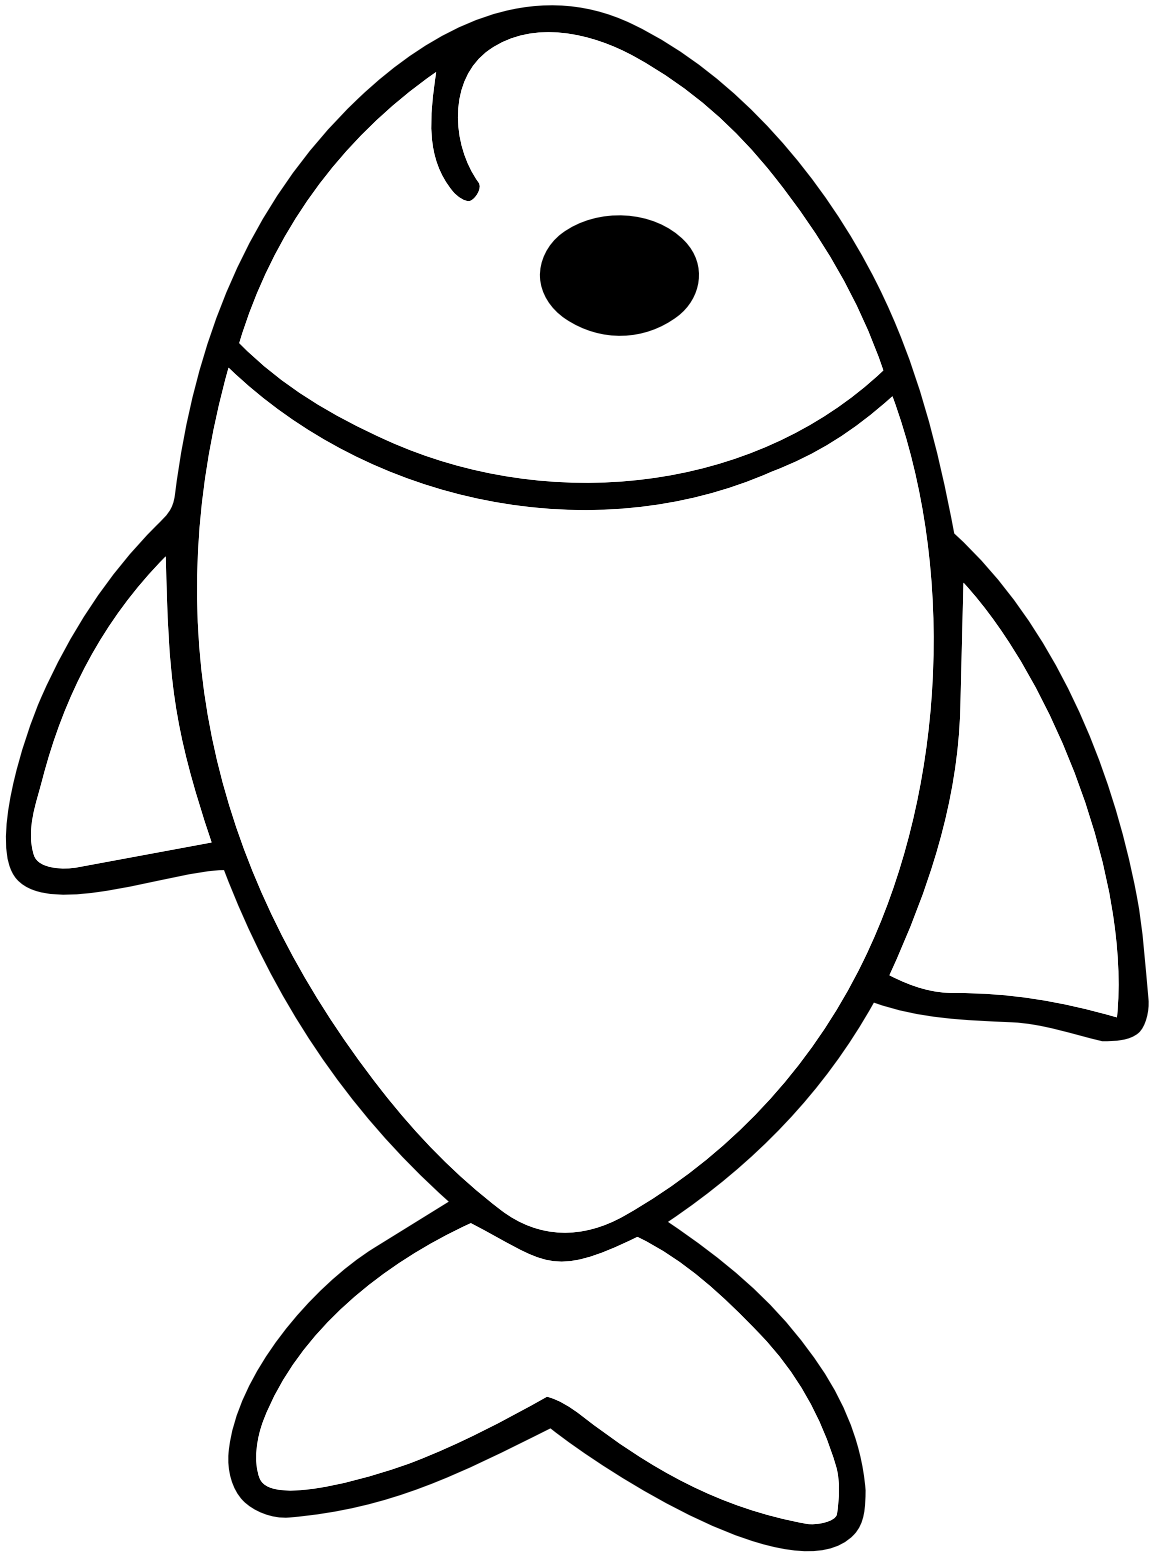

You will design at least 3 different paper airplanes that represent kingfishers. Each design must be different (shape, size, etc.). Keep the shape of a kingfisher's body and wings in mind as you create your designs.

Color and cut out the fish on page 2 and place it on the floor. This will be your target. Stand about 10 feet away from the fish. Then, throw your paper airplanes at the fish.

The plane that lands closest to the fish wins. Use markers and other coloring utensils to design your winning plane as a kingfisher.

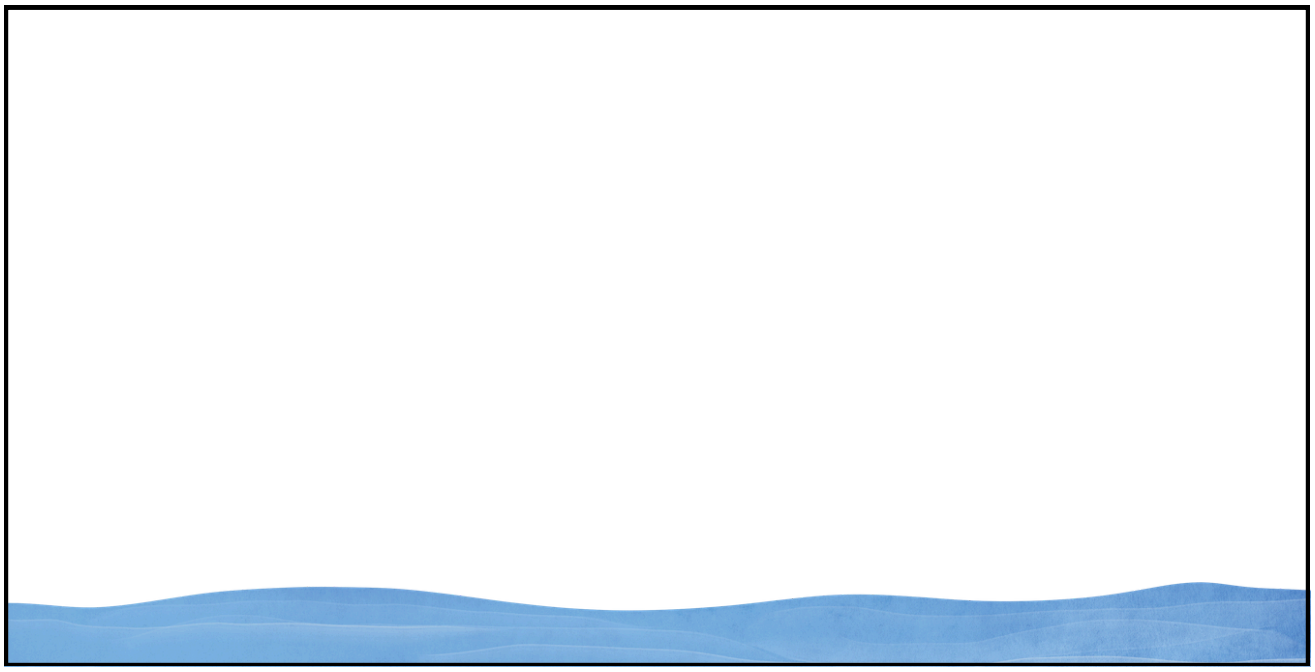

Answer the questions on page 3 to complete the challenge.

KINGFISHER CHALLENGE

KINGFISHER CHALLENGE

1. Draw a picture of a kingfisher diving through the air.

2. Draw a picture of your paper airplane diving through the air.
