

Macaw Challenge

What Would Happen?

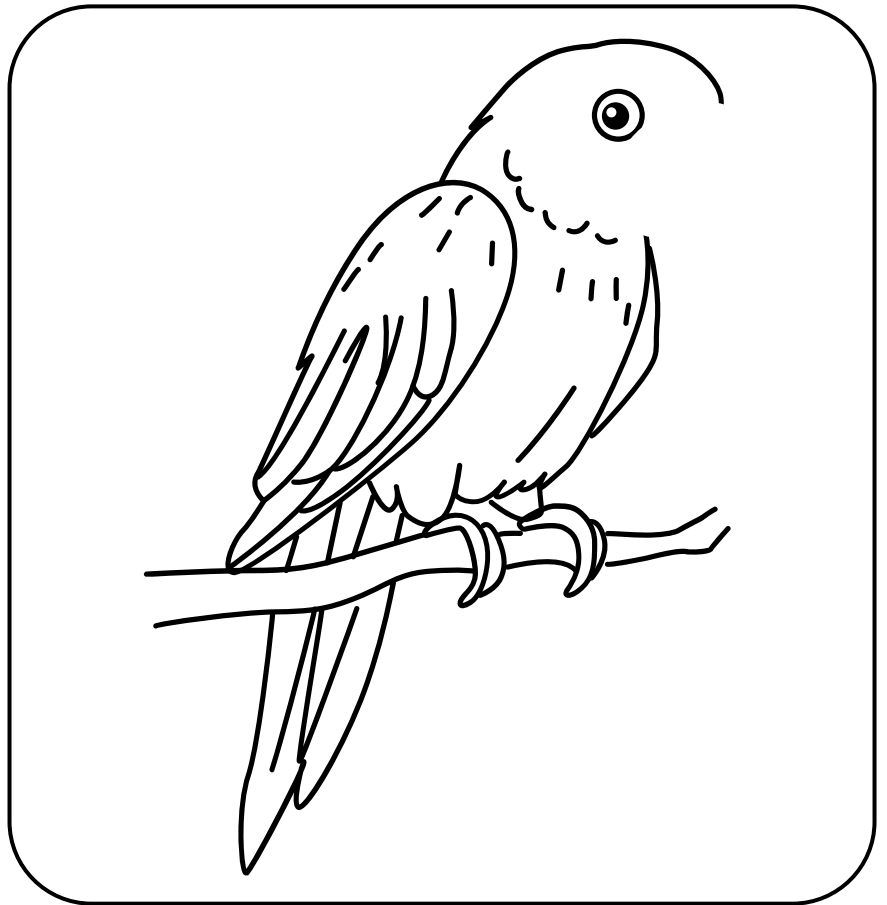

Determine what would happen if macaws had different traits.

Draw and color a macaw with each new trait. Start thinking while you draw...

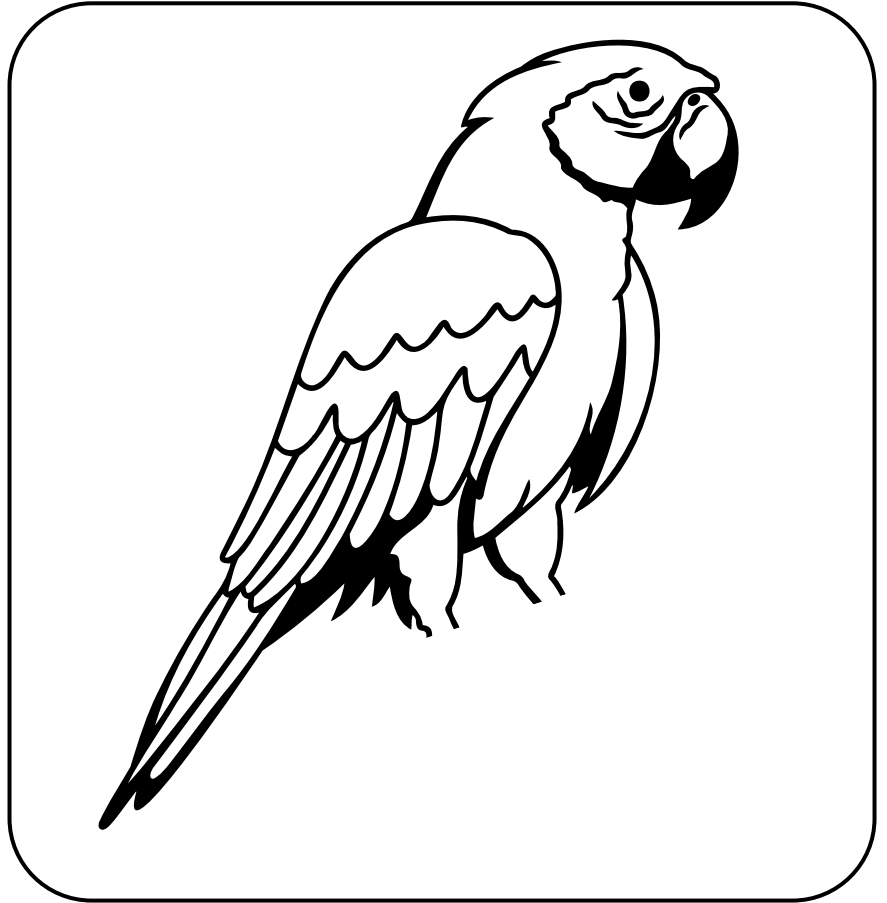

- What does this trait usually look like on macaws?
 - Does this trait usually help macaws?
- Would the new trait help or harm macaws?
- Would they have to change their behavior?

Discuss your thoughts for each new trait as a group.

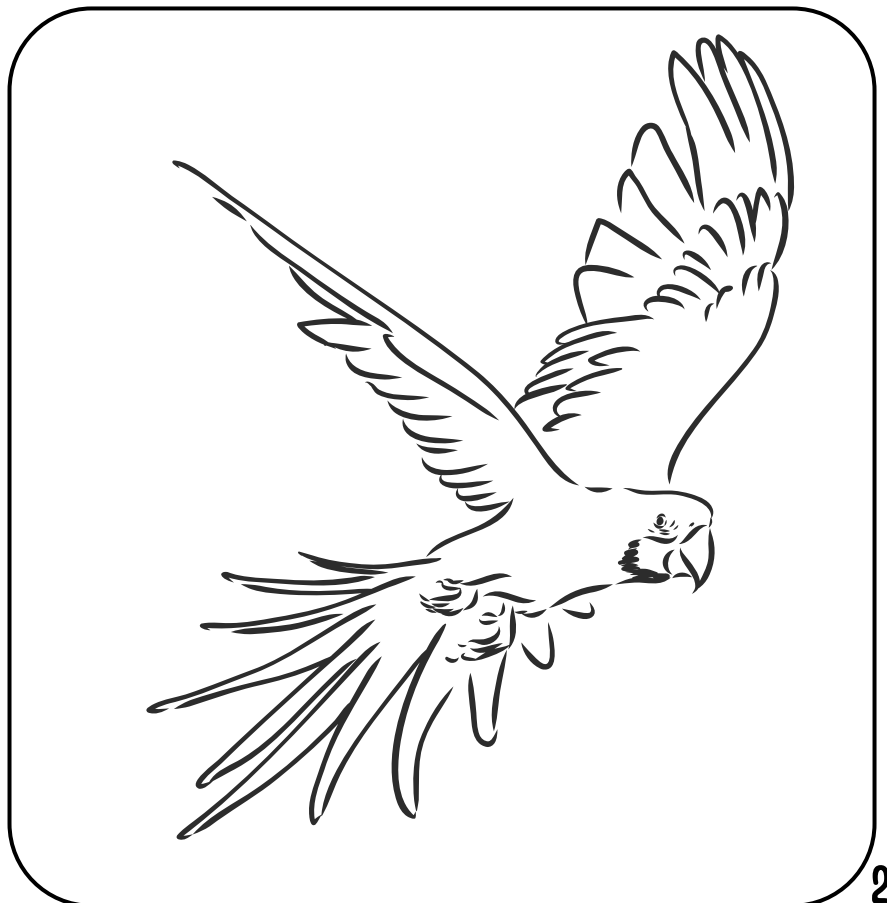

**Trait #1: Macaws
have a wide, flat
beak**

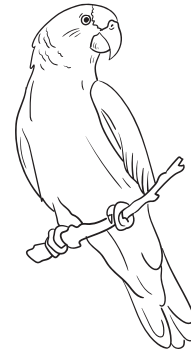

**Trait #2: Macaws
have webbed feet.**

**Trait #3: Macaws
have pale brown
feathers**

Trait #4: Macaws
are as small as
hummingbirds.

Trait #5: Macaws
nest on the ground.
