

Marlin Challenge

You are participating in a scientific study to learn more about marlins.

You join a team of sport fishers on fishing trips for one month to catch and collect data from marlins. Your goal is to learn more about their distribution, average size, diet, and speed. Over the course of your study, you collect data from 15 marlins.

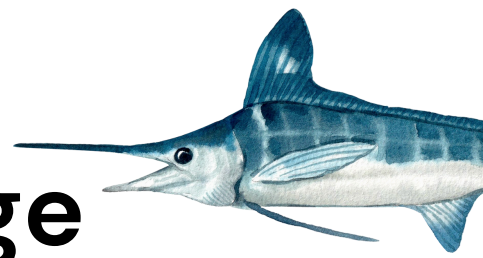

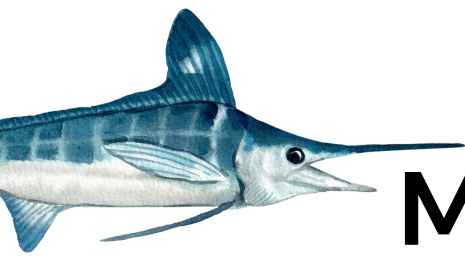

Follow the prompts below to describe...

1. **What** data you will collect
2. **How** you will collect it

You want to learn what parts of the ocean marlin live in.

1.

2.

Marlin Challenge

You want to learn their average size.

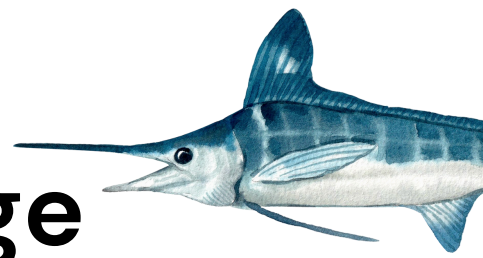

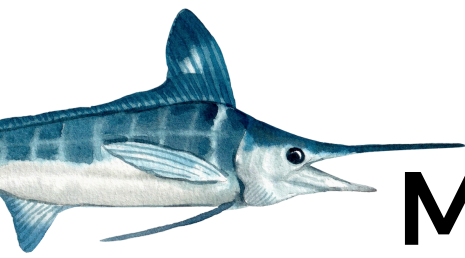

1.

2.

You want to learn what marlins eat.

1.

2.

Marlin Challenge

You want to learn how fast marlins swim.

1.

2.

How will learning more about marlins help us protect them?
