

Bird of Prey Problems

Determine which traits make owls similar to or different from other birds of prey (like hawks and eagles) by drawing a line to the correct box.

1. They are carnivores

2. They have a sharp, hooked beak

3. They are nocturnal

4. They catch food with talons

5. They have a strong sense of hearing

6. They cannot move their eyes

7. Females are larger than males

8. They have feathers

9. They fly silently

10. They turn their heads 270 degrees
