

What are the benefits?

You can increase website traffic and generate more sales with a multi-screen website that loads in under 3 seconds.

Reliable Hosting

All of our websites are hosted on Amazon's worldwide hosting service, so you know your site will always be available online.

Responsive Design

Your site will work perfectly on desktop, tablet and mobile, so customers have the best possible experience on every device.

Advanced Widgets

We use a variety of widgets designed to get you more phone calls, appointments, reservations, visitors and customers.

Analytics

We employ a full suite of analytics and tracking software so you can see how your online efforts are paying off.

SEO Help

We'll make sure your site is Google-friendly by customising the SEO settings to make it easier for customers to find you online.

Social Media

Connect with your customers when they are not on your website. We will add social icons so visitors can easily follow you.

Lightning Fast Multi-Screen Websites

Powerful responsive websites that improve SEO, increase traffic and user engagement

Increase sales with a multi-screen website!

Your website is the window to your business. With Eazi-Sites, you can get ahead of the competition and give your customers a great online experience on any device.

All Eazi-Sites websites are optimised independently for desktop, tablet and mobile. Increase customer engagement and watch your traffic soar. Our powerful website editor makes it easy to update text, add promotions, change images or even add new pages.

Lightning-fast loading speed

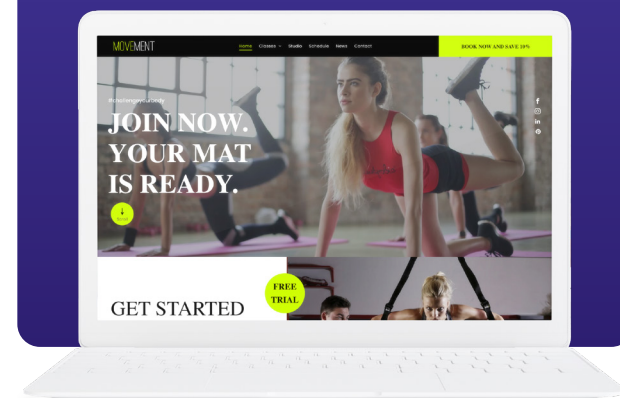

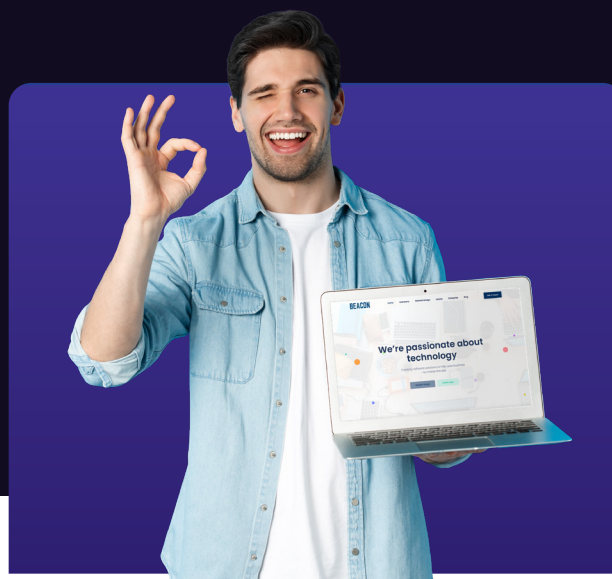

For every second it takes your website to load, you lose 7% in conversions*. That is why Google is now using page speed as a ranking factor. Visitors are more likely to engage with your website if your content is delivered faster.

Eazi-Sites websites are built for speed and work on all devices. In addition to the SEO benefits improved page speed brings to your business, there are many conversion and engagement advantages, such as:

70% longer sessions

60% more page views

35% lower bounce rate

Capture Your Customers' Attention

Have you ever noticed personalised offers or notifications that display on websites based on your browsing habits? Large organisations like Amazon and Google do this all the time. Now it's your turn.

Triggers

Choose a trigger to activate your website personalisation. Triggers can include time, location, previous visits and more.

Actions

After you choose a trigger, select from ready-made actions such as popups and notification bars.

Conversions

Engage site visitors by displaying customised actions at exactly the right time and watch your conversion rate soar.
