

ART4IMPACT

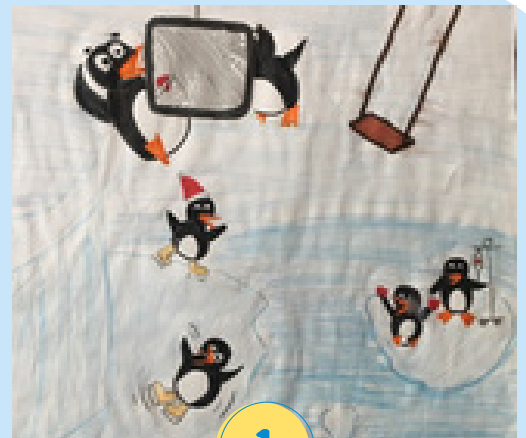

“Walls that tell stories of hope”

Participate to brighten up hospital walls

Since 2017, the Art4Impact program invites children and adolescents to engage in a concrete and creative project : bringing joy and hope to hospitals through their drawings.

How it works

1. Imagine a positive emotion that you want to share
 2. Select bright, vivid colours to illustrate this emotion
 3. Create a joyful universe or scene and tell your story in pictures
- Make sure the drawing is unique, personal and lively (avoid existing characters)
 - Display your drawing onto a hospital wall using our [Anouk4Impact app](#)
 - Send us your drawing to info@anouk.org : add your name, age and city

Example

1

Child's drawing

Program objectives

Offer young people a solidarity-driven artistic project, which has a real impact on hospitalized children.

Celebrate the creativity of young people and start to give them a voice to improve the world.

Example

2

Painting of the drawing

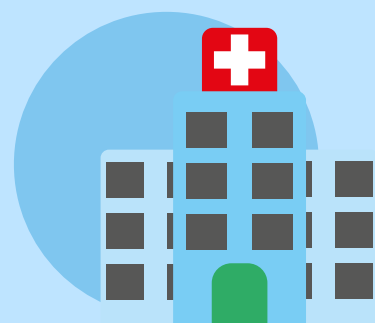

For children

A unique opportunity to get involved for others, to feel valued and to highlight your talent.

For schools

An educational program recognized for stimulating creativity, developing empathy and encouraging artistic expression.

For hospitals

A series of murals inspired by children that humanizes the healthcare setting and improves the well-being of young patients, their families and healthcare teams.

ART4IMPACT

Impact of the program

- 22 schools and hospitals are our program partners
- More than 1'200 children and adolescents engaged
- 24 murals created in pediatric wards
- Direct contribution to several UN 2030 Sustainable Development Goals
- Aligned with the International Convention on the Rights of the Child (Art. 5 : Right to a welcoming environment)
