REINFORCED EDGE

Fabric

The top panel fabric stretches with your body weight which helps the comfort layers contour to your body shape. Once your weight is off the fabric, it condenses back to its original form.

Premium Foam

30mm high density premium foam provides a plush, medium or firm comfort level.

Hinged Probox

Superior 90mm wide side support around the perimeter of the mattress. Provides edge to edge sleeping surface without roll out. Hinged walls maximize the flexibility.

Viscoool

The phase change material technology provides an open cell structure that guarantees a higher moisture exchange and breathability. It contains 20% soybean oil making it the most natural foam available.

5 Zoned Pocket Coil

5.5 turns coil Spring, reduced partner disturbance and contours to your body shape. The middle section has a higher gauge wire which provides extra support for your lumbar area.
