ROLLZ MOTION

2-IN-1 WALKER WHEELCHAIR

Walk when you want. Ride when you need a rest.

The ROLLZ MOTION is a rollator that converts into a wheelchair in seconds. Walk as far as you like, then attach the wheelchair package and footrests so a carer can push you the rest of the way. It is the only convertible walker wheelchair that meets ISO standards as both a rollator and a manually propelled wheelchair, certified by TÜV Rheinland.

TWO PRODUCTS IN ONE

Rollator and certified wheelchair in a single unit. The wheelchair package and footrests are included.

WALK TALL

Inverted, height-adjustable handles let you stand upright and close to the frame, steering with your palms instead of your wrists.

RELIABLE BRAKES

Drum brakes work well in wet and dry conditions, with a parking brake for sitting.

KERBS MADE EASIER

A curb-assist lever beside each rear wheel helps lift the front wheels over kerbs and thresholds.

EASY TO FOLD

Scissor-folding action. Remove the wheelchair package and it folds to 31 cm wide for the car boot.

AWARD-WINNING DESIGN

Designed in the Netherlands and winner of the iF and Red Dot design awards.
