

# THE REVOLUTION CHAIR

**1.** Position the chair facing the table so the arms are 35mm from the table edge. Make sure the canted legs are positioned to the front. This provides stability when the seat is extended forward.

**2.** Turn the seat left or right to meet the user. The seat will lock for safety. When seated, lift the swivel lever (A) and rotate the chair to face the table.

**3.** Lift the slide lever (B) and move the seat forward. Release the lever and the seat will lock in the first position. To move closer to the table, lift the lever, slide forward to the second position, then release the lever again.

**4.** To exit the chair, lift the slide lever and glide the seat back. The seat rotates left or right, locking for a safe exit.
