

Scout Program Information

We are excited to welcome your scout group to the Darien Nature Center! Please read the following information to help prepare for your visit!

What to Expect

- Some or all of our programs take place outdoors. Closed toed shoes and appropriate outerwear (for cold or light rain) will make for a positive and more comfortable learning experience for all.
- Sunscreen and insect repellent should be applied prior to your program.
- Upon arrival, a Darien Nature Center Educator will meet you in the lobby or just outside the Nature Center.
- If your group is planning on bringing and eating snack at the Darien Nature Center, please let us know ahead of time.
- The Darien Nature Center will provide all materials for your program. If you would like to provide your own project materials, please let us know beforehand.
- If any scout member or chaperone has mobility challenges, please let us know ahead of time so we can plan accordingly.
- If it is lightly raining, we will still go outside. If the weather calls for heavy rain, thunder/lightning, extreme cold/heat or poor air quality, we will move the program indoors.
- Chaperones will be expected to actively participate in the program with staff guidance. Darien Nature Center educators are not solely responsible for group management.
- Parents should check their children for ticks when they come home.

Please reach out if you have any questions or concerns. We look forward to your visit!
