HEMPTENSILS™

JUST THE ESSENTIALS

BREAK FREE FROM PLASTIC

It's TIME. 91% of all plastic doesn't get recycled, and will take centuries to degrade. With over 8 Billion tons of petroleum waste per year (and much of it ending up in the ocean) the hemp industry is teaming up to offer alternatives.

**MADE
IN
USA**

Industrial Hemp is increasingly available, and removes more carbon from the atmosphere than any other crop. Increasing demand for hemp helps fight Climate Change and strengthens our Economy!

**FDA
APPROVED**

Health scares have increased demand for single use items, putting more focus on the plastic waste / recycling crisis. Your actions can offset it when you choose goods like Hemptensils & HempStraws!

Made from a plant based blend of Hemp compostable alternatives cut the end of life far down. When properly disposed of, they will degrade into food for soil bacteria in as little as 6 months!

HEMP HEALS THE

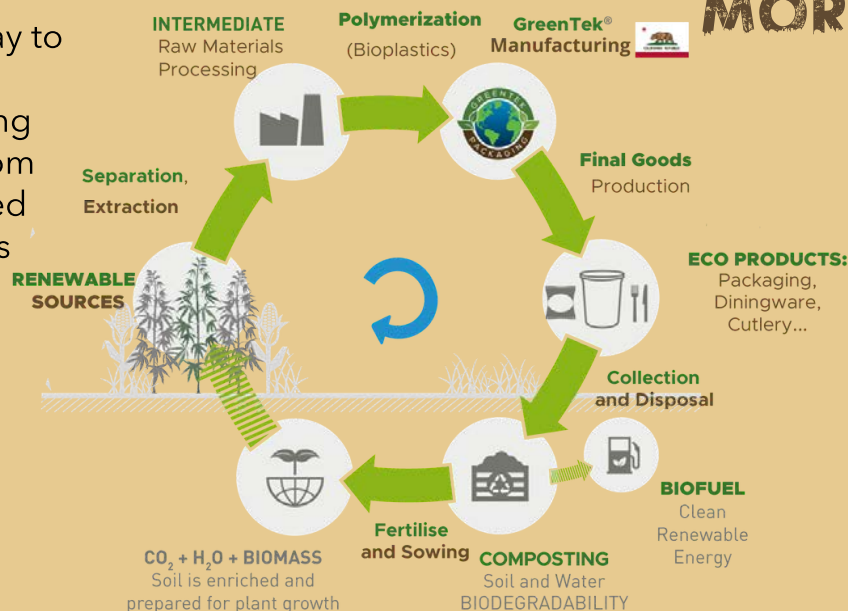

HEMPTENSILS

are the best new way to reduce your carbon footprint when eating on the go. Made from hemp and fermented sugar, these utensils can be organically recycled and reduce to basic elements in just 6 months*.

*When tested in an aerated compost with common, active microbes

CARBON NEGATIVE LIFE CYCLE

LESS CO₂

MORE COMPOST

Industrial Hemp fibers are often burned after harvest, releasing GreenHouse Gases and worsening climate change. Hemptensils utilize these materials to make naturally brown compostables, avoiding confusion with traditional plastics**

**Many Compost Centers turn down other biodegradable utensils because they are hard to differentiate from petroleum plastics, which never degrade.

HEMPTENSILS™

PRODUCT LISTING (MSRP)

- + GreenTek is the Domestic Leader in Hemp Biopolymers
- + Industrially compostable, 100% Petrol-free. Double win.
- + Ability to deliver custom options to meet any demand
