TARGET/ PURPOSE	Recommended mixture of Herbicides	DOSAGE
Broadspectrum	SUMIMAX THE Sugarcane Herbicide 750WG	*At 0-5 days after planting* Applied Alone: 250-300g SumiMax® per hectare. In tank mixtures with the label use rates for either Atrazine 80WP or Diuron 80WP: 150g SumiMax® per hectare
Post Emergent Broadleaves and Sedges	Hedonal 2,4-D Amine	13-25 tbsp/16L 2L per 200 L drum (4L per hectare)
Surfactant, Soil Aerator and Water Infiltration Agent	TRANSFORMER®	*As surfactant* 250ml per 200L drum (0.5L per hectare) *As soil aerator and water infiltration agent* 1L per 200L drum (2L per hectare)
BILIS-LAKI SA PHOSPHORUS	OMEX DP-98	*As Foliar Fertilizer* 1L per 200L Drum (2L/Ha)
Increase Sugar Yield	Cane Ripener 48 SL	2 - 3 liters per hectare 6 - 8 weeks before harvest

A broadspectrum herbicide that provides efficient weed control even for Diuron-tolerant weeds

- Crop safety, weed control at par, if not better that industry practice of Diuron + 2, 4-D Amine
- Long residual control at par or longer than existing products
- Diuron-tolerant weeds controlled
  - i.e. Rottboellia conchinchinensis, and ipomea
- Cost is competitive with Diuron plus 2,4-D Amine even when used as blanket spray

A systemic selective post-emergent herbicide effective against broadleaves and sedges.

- Highly soluble in water
- Highly compatible for mixing with glyphosate, diuron & other herbicides
- Can be used even during hot weather

A systemic, non-selective, broadspectrum and persistent post-emergent systemic herbicide that kills all kinds of weeds within 3 days.

- Fast acting general weed killer with no residual effect
- Ideal for weed clearing of perimeter and canals

A contact, non-selective, broad spectrum, post-emergent herbicide for the control of hard-to-kill annual perennial grasses, sedges and broadleaf weeds.

- Controls non-selective herbicide resistant weeds
- Environmentally Safe
- Ideal for inter-row weeding

A 4-in-1 soil conditioner and surfactant that contains orange oil, which improves water infiltration, soil aeration and reduces herbicide odor.

- Improves infiltration of water in soil
- Accelerates carbon dioxide-oxygen exchange
- Stimulates microbial activity
- As surfactant, emulsifies and binds herbicides for better efficacy and reduces odor

Mataas na Phosphorus para sa magandang pag-uugat

- Mabilis na 'absorption' ng mga sustansya mula sa lupa
- Water-soluble phosphorus for rapid uptake
- Tumitibay ang halaman laban sa atake ng mga 'AMAG' boost energy para sa mabilis na paglaki ng tanim

The Sugarcane Ripener applied using drone technology

- Contains N-phosphonomethyl glycine as ripening agent
- Accelerates maturity of sugarcane
- High sugar recovery

As a sticker, spreader, wetter and penetrant made from orange oil that enhances the efficacy of commonly used pesticides

- Enhances wetting, spreading and penetrating properties of pesticides
- Accelerates the movement of pesticides active ingredients and nutrients through the plant
- Masks the smell of odorous pesticides

Recommended Insecticide against RSSI

- Insect Growth Regulator
- Nymphs specific
- Affects fecundity of Female Insects
- With 10-day residual action
