 Jardine Distribution, Inc. Philippines

TARGET/PURPOSE	Recommended mixture of Herbicides	PRE-EMERGENCE 2-7 days after planting (Blanket Spraying)	EARLY POST 8-14 days after planting (Inter-row Spraying)	LATE POST 17-30 days after planting (Inter-row Spraying)
Broad leaves and Grasses		<i>For Liquid Concentrate Option</i> 0.75-1.0L per 200L drum (1.5 - 2L per hectare)		
		<i>For Wettable Powder Option</i> 0.75-1.0Kg per 200L drum (1.5 - 2kg per hectare)		
Post Emergent Broad leaves and Sedges		2L per 200 L drum (4L per hectare)		
Surfactant, Soil Aerator and Water Infiltration Agent		<i>As surfactant</i> 250mL per 200L drum (0.5L per hectare)		
		<i>As soil aerator and water infiltration agent</i> 1L per 200L drum (2L per hectare)		
White Grubs	Recommended Insecticide*			
		100ml per 16L sprayer x 25 tank load per hectare as needed		

A highly effective systemic pre- and post-emergent powder herbicide made of high quality active ingredient for grasses and broadleaves.

- Cost effective solution with wide window of application
- Can be used to control weeds in the peripherals of the farm with minimal damage to crops
- Mixes easily with water

A broad spectrum liquid herbicide with advanced weed killing soluble concentrate formulation that is effective against a wide range of broadleaf weeds, annual and perennial grasses.

- Liquid concentrate with enhanced efficacy
- Mixes easily with water and other herbicide with no residue
- Flexible window of application with long residual action

A systemic selective post-emergent herbicide effective against broadleaves and sedges.

- Highly soluble in water
- Highly compatible for mixing with glyphosate, diuron & other herbicides
- Can be used even during hot weather

A systemic, non-selective, broad spectrum and persistent post-emergent systemic herbicide that kills all kinds of weeds within 3 days.

- Fast acting general weed killer with no residual effect
- Ideal for weed clearing in dikes and canals

A 4-in-1 soil conditioner and surfactant that contains orange oil, which improves water infiltration, soil aeration and reduces herbicide odor.

- Improves infiltration of water in soil
- Accelerates carbon dioxide-oxygen exchange
- Stimulates microbial activity
- As surfactant, emulsifies and binds herbicides for better efficacy and reduces odor

A soil conditioner with ionized Calcium that prepares and balances soil acidity for optimum crop yield.

- Restores and improves soil quality
- Increases yield from improved nutrient uptake
- Fast pH stabilizing effect

A contact, non-selective, broad spectrum, post-emergent herbicide for the control of hard-to-kill annual perennial grasses, sedges and broadleaf weeds.

- Controls non-selective herbicide resistant weeds
- Environmentally safe
- Ideal for inter-row weeding

A highly effective insecticide that controls white grubs infestation with its 3-Phase Action (contact, vapor, ingestion)

- Highly effective in killing 1st and 2nd in star grubs
- In liquid emulsifiable concentrate (EC) form
- May be timed with granular fertilizer application
- May be applied in both new cane and ratoon planting
