

UltraLux Red Cap: Your Hair Regrowth Solution

Explore the potential of the UltraLux Red Cap, your ultimate solution for hair regrowth. With the Red Cap, you can enjoy:

- Healthier, fuller hair
- Enhanced brain function and memory
- Relief from various scalp conditions

Give the Red Cap a try today! We've got your hair covered.

The Red Cap: Your Comprehensive Hair Renewal Solution

Transform hair regrowth with the power of red light therapy. The UltraLux Red Cap is thoughtfully crafted to combat hair loss, so you don't have to resort to the popular hair regrowth chemical treatments. We understand how painful hair loss can be, and that's why we created this product—to reverse the process with a natural solution you can trust.

Unlock UltraLux Hair Health

The Red Cap stands out due to its ability to tackle hair loss at the root cause. Utilizing the most potent FDA-cleared light wavelengths available, you can trust that you're receiving a proven hair growth treatment. Get ready for your hair to make a remarkable comeback!

The Science Behind Red Light & Fuller Hair

Get rid of unfamiliar hair growth creams and chemicals—the UltraLux Red Cap utilizes specialized, high-irradiance light therapy wavelengths, proven for effective hair regrowth. These wavelengths penetrate beyond the skin barrier, stimulating dormant hair follicles and boosting hair growth.

Potent Irradiance for Remarkable Results

Irradiance measures the power and effectiveness of a light wavelength. The UltraLux Red Cap utilizes widely-used wavelengths proven for optimal hair regrowth. However, this product distinguishes itself from other light therapy caps with its strong surface irradiance, reaching up to 205 mW/cm². We believe that more power results in hair regrowth that you can feel confident in.

Personalize Your Hair Health Journey

The UltraLux Red Cap features is controlled via remote, offering a variety of settings for noticeable results. Whether you're looking to boost hair thickness with pulsed light therapy or address scalp conditions with continuous light, the power is in your hands. This product allows you to tailor your hair regrowth journey according to your specific needs and preferences.

Red light (630 nanometers)

- Stimulate hair growth and density
- Trigger stem cell regeneration
- Effectively address common skin disorders like eczema & psoriasis

Infrared light (850 nanometers and 940 nanometers)

- Revitalize scalp health
- Enhance mental stamina and cognitive performance
- Accelerate wound and injury recovery

How To Apply

Achieving your hair goals shouldn't require a complicated routine. The UltraLux Red Cap is easy to use and even more effective! With settings that control power level, wavelength type, and time, your treatment session is genuinely personalized for your unique needs.

1. Plug the power cord into an outlet and place the cap on your head.
2. Power on the cap and select your preferred treatment type.
3. Ensure the cap fits snugly against your scalp.
4. Relax, sit back, and let the UltraLux Red Cap do its magic!
