

Matchmaking registration form Green Hydrogen in Uruguay

Starting with the launching of the H₂U pilot project, the authorities expect private interest for the development of other projects for the production and use of green hydrogen. To facilitate contact between institutions with experience in different components of the hydrogen supply chain, a list will be published with those that are interested in appearing and sharing information.

In the short term, a tender to award the first pilot of green hydrogen production and use in transport will be released. It will be a competitive tender among private companies which can submit the offers individually or in association with other companies as way to provide a comprehensive solution to the pilot project. The company or group of companies shall submit an offer that includes the design, construction, financing, ownership, operation and maintenance (Design-Build-Finance-Own-Operate-Maintain) for the production of green hydrogen (H₂ Verde), compression, storage, dispensed and commercialization of green hydrogen to trucks and/or buses.

The below form is intended for institutions interested in appearing on a public list, so that companies can contact each other to jointly develop Green Hydrogen projects in Uruguay. For example, if a transport company is interested in having hydrogen electric trucks, it can register so that another company that is going to apply for the call can contact it and present themselves together or establish a specific agreement.

For information & guidance on Uruguay and investment conditions / incentives, as well as links with local actors, contact the [Government Agency for the promotion of investments & exports - Uruguay XXI](#)

Please fill out the form below and send it to hidrogeno@miem.gub.uy to register your institution's/company's information in our database.
