

ODS myAsset Solution Brief

Proposed Solution – myAsset

Asset lifecycle management application for finance compliance enabled with QR & RFID scanning.

Key Capabilities:

- Auto scheduling and allocation of asset tagging and sighting work orders.
- Combined financial and operational view of assets for the end users.
- Print one or multiple tags in one go.
- Integration with mobile and desktop printers.
- Supports offline working to ensure efficiency.
- Out of the box integration with SAP ECC and S/4 HANA.
- Native user experience for easier adoption.
- Supports both Android and iOS.
- Supports picture attachments.
- Supports barcodes, QR codes and RFID scanning.
- Allow processing of multiple assets in one go.
- Update asset location in just one scan.
- Supports creation of notification for the operations team from the asset screen.
- Operational dashboard.
- Supervisor view to monitor sighting work progress and review.
- Allows integration of safety and operational checklists.
- Gain real-time asset visibility for monitoring
- View historical activities carried out on the assets
- Integration with myJobCard, myPlanner, myWarehouse etc.

Thank You!
