# PRODUCT GUIDE

BIO-CUP LTD, a division of Foodpac Technology Ltd, has been established to bring sustainable solutions to the food service industry.

Working in partnership with possibly the largest global pulp and board manufacturer, and our cup forming partner with the capacity to produce in excess of 3 billion units per annum, we are pleased to deliver the new generation of aqueous dispersion coating technology. Our unique formula developed and produced in-house now provides a commercially viable product for major brands.

First-generation aqueous coatings can only be run on slow output machines which are therefore unable to meet the demands of high volume end users. The method of application and the formula has led to cups failing and having leakage issues. Our new formula has designed out the elements causing these issues and, with an advanced method of application and cup forming, combine to deliver a stable product available in huge volumes.

We welcome discussions with all end-users and their distributors to discuss small and large volume opportunities. The minimum run for bespoke designs 100,000 per design per size but if you require 500 million cups per annum or more we can handle this volume comfortably.

For further information contact us using the methods below or watch our video at [bio-cup.co.uk](http://bio-cup.co.uk)

## 25 YEARS OF PROFESSIONAL SERVICE

Anbao is a professional food container packaging manufacturer established for 25 years focusing on the production, research & development and sales of paper food packaging containers.

	Non-Bio	Biodegradable Solution		
PARAMETER	PE	PLA	PBS	Water-based
Composition	PetroleumBased	CornBased	50%Bio: 50% Petroleum	Nano Composite Material

## 10 PRODUCTION BASES

Anbao has 10 production bases, 6 in China and 4 in Thailand. Its products are widely distributed in many countries and regions such as Asia, Europe, America and Australia, gaining the trust of world-renowned food enterprises and providing services for them.

## ANNUAL PRODUCTION OUTPUT OF 3 BILLION PIECES

Each year, Anbao provide 3 billion paper cups, bowls and boxes for customers to meet the growing demand for food packaging and provide customers with professional customised services of large-scale production.

## INNOVATION AND ENVIRONMENTAL PRODUCTION

Anbao has a professional, innovative design team to design and produce innovative products and environmental protection materials for customers.

# ECO-FRIENDLY MATERIAL

- Aqueous Technology
- Plastic-Free

Next generation Green Aqueous Technology could slash the quantity of long-lasting plastic waste generated by your products. That's great news for the cities we live in. It's great news for the consumers who want to play their parts. And its great news for your brand.

But we need your help to make it happen. Together let's join hands to propel a cleaner world.....

And your greener brand.

## Aqueous Coated / Plastic Free Cup

The new paper cup, made with FSC certified paper laminated with water-based material is recyclable, repulpable and food safe with no fluorine.

We can also customise according to your requirements.

AQUEOUS CUPS

No Coating

No Plastic

All Natural

# PAPER CUPS

- Single Wall Cup
- Double Wall Cup
- Ripple Wall Cup

## SINGLE WALL CUP

3oz-85ml	Ø 56x38.6x56.55mm
