HANDLE® Level 1-2 Intensive

A Deeper look into Learning and Life's Challenges
Understanding Disorders at Their Roots

Open to All

HANDLE® is a Holistic Approach to Neuro-Development and Learning Efficiency

The HANDLE® Approach has helped families across the nation and around the world to achieve significant results, like walking, talking, writing, memory and staying attentive from early childhood through elderly. It incorporates many different disciplines and provides families, caregivers, educators and therapists with a gentle, powerful, respectful, non-invasive and non-drug approach to seemingly unsolvable and hopeless situations, and enhances all forms of learning, both in children and adults.

No one is too old for HANDLE.

- A 16-hour course teaches the Foundations and Applications of Judith Bluestone's pioneering, award-winning HANDLE Approach which developed theories on Attention, Autism and more through the lens of an array of life and learning challenges, affecting young children to elderly.
- Understand what behaviors can reveal about neurological irregularities using the HANDLE paradigm, and begin to see behaviors as communication with new "HANDLE eyes".
- Look beyond the labels at the underlying causes of conditions such as Learning Disabilities, ADD/ADHD, Autism Spectrum Disorders and more.
- Recognize subtle signs of stress, and learn how to use Gentle Enhancement® to prevent crises and foster resilience.
- Discover the interconnected relationship of nutrition, neurophysiology, healthy movement and more.
- Gain insights and receive some practical ideas you can use immediately.
- Learn 12 unique HANDLE activities, and explore how the activities can be applied and adapted to enhance focus, reduce stress, and support learning, attention, motor or behavior challenges at any age. These Activities can be immediately applied in classroom, home and clinic settings.

The information you receive may change your life.

Instructor:

Nancy is a Certified HANDLE® Practitioner and HANDLE Instructor of Levels 1 & 2 and the Screener training course (Level 3), and involved with HANDLE® since 2009. She is also a Certified Nutritional Therapy Practitioner. Her HANDLE work has focused predominantly on children with significant neurological challenges, including "non-verbal", but her work also includes adults as well as children with broad range of neurological challenges including aphasia, stroke, cerebral palsy, traumatic brain injuries, autism, attentional disorders and much much more. Nancy is also currently studying Holistic Herbalism. Nancy has works directly with the ongoing operations of the HANDLE Institute
